SAVE THIS YEAR

Here are matchless seed bargains. Tested seeds of guaranteed quality selling at drastically reduced prices. Check these amazing values. Many prices the lowest in all history. It's the quality of our seeds that makes our bargains so attractive. Buy direct. Save money. It will pay you well to study every page in this book.

WORLD'S LARGEST SEED HOUSE  
SELLING DIRECT TO THE FARMER

# BLUE RIBBON QUALITY SEEDS

EVERY POUND **GUARANTEED** TO GROW

**J. F. SINN**  
President Berry  
Seed Co.

A farmer by birth  
and early training.  
Connected with  
our Company for  
over 26 years.

Recognized as  
one of the fore-  
most men in the  
seed business.  
He makes it his  
business to see  
that you get  
more seed  
value for your  
money.

He is always  
at your ser-  
vice, and  
glad to help.

DEAR FRIENDS:

Stop! Look and listen. Never in the history of the seed business, were we able to offer such unparalleled Bargains. This Blue Ribbon Sales catalog is chuck full of Big Money Saving Values.

Every day that passes by brings us just that much nearer better times. Be prepared for higher markets later. Seed most of your land down while grain prices are so ridiculously low. There was never a better time to sow lots of grass seeds than now.

In order to meet the low buying power on the part of the farmer and to create more desire to sow seeds, we have cut our prices to rock bottom and then some. You will find you can save from \$2.00 to \$4.00 a bushel on Alfalfa. Also big savings on all kinds of seeds. No one attempts to meet our low prices and furnish the same high quality.

We still go further. You will find with the catalog a check that you can use and again make still further savings on your seed order. You also have a chance of winning a fine prize by sending your orders to the Berry Seed Company. When you Stop, Look and Listen you cannot afford to pass by the opportunity of buying from us.

When you buy your seeds from the Berry Seed Company you take no risk. We guarantee the quality—we also guarantee our prices are lowest. We have a record of 38 years of successful experience in the seed business. Our guarantee gives you 60 days to satisfy yourself that you have saved money and have a big bargain in your purchase or we will trade back.

No matter how short money may be with you, try and buy your seeds from Berry. Your dollars will go further and you will be taking no chances on quality. If there ever was a time that we could serve the seed buyer to advantage, it is now.

Seed crops were very short, northern Alfalfa almost a failure. Red Clover, Sweet Clover and Alsike are likewise very short crops. With a normal demand for seeds, many items will be much higher and difficult to obtain. There was not enough produced to go around. Now is a splendid time to buy while all lots are available at bedrock prices. Practically ever economist reports we are gradually headed for higher markets. Nothing is to be gained by waiting.

This is the only catalog issued and is complete. Everything has been reduced in prices, offering bigger bargains than ever in not only Farm Seeds, but Nursery Stock, Ornamental Shrubbery, also Garden and Flower Seeds. Use this catalog and make up your order.

Remember your order gives you a chance at the prizes. If you have never ordered from Berry, start now while prices are lowest. I will guarantee to please you and save you money.

Sincerely your friend

Greens Fork, Ind.  
Dear Sirs: Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.  
D. W. HARRIS

Springville, Iowa  
Gentlemen: The Marvellous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.  
Yours truly,  
C. F. BUTLER

Mount Clare, W. Va.  
Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.  
Truly yours, G. W. CONLEY

New Berlin, Ill.  
Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farm-er friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.  
J. W. GERHARDT

Hummelstown, Pa.  
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Lot Honest John Alfalfa has given me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.  
Yours truly,  
DANIEL BEHRENS

## 38 YEARS SELLING DIRECT TO FARMERS

# Amazing CASH OFFER for NEW CUSTOMERS

SEE CHECK ATTACHED TO FRONT COVER

## We Pay You Money to Get Started to Trading With Us or Give You a 32 Piece Dinner Set Free

This year, instead of spending all of our advertising money with farm papers, we are going to give it to our customers. The reason we advertise is to build up our business; to get New customers.

For 38 years we have been building a seed business for direct service to farmers. It has grown rapidly. Many years ago it towered as the largest seed house in the world selling direct to farmers. It is still growing. We have put our profits back into the business so that we might give you better values, cleaner seeds and better service.

Our financial strength has grown until we stand recognized as leaders in the field, one of the foremost seed organizations in the nation. We come to you as an old established, reliable and responsible firm. Our customers are numbered by the hundreds of thousands. They have come from every state in the union and they have stayed with us. They saved money, liked our seeds and our methods of doing business.

### Now We Want to Serve You Too

We know we can satisfy you. The Bargains that we have in this book cannot help but convince you that you can save money by buying from us. When you read over our guarantee, bank reference and the letters from farmers who have bought from us you know that we are reliable. We know that if you send an order that you will be completely satisfied. That is why we offer you the enclosed check. We are pledging our money against the chances that a trial order will make you a permanent customer.

### Check Attached Is as Good as Gold

You can use it on your first order. Its value depends on the amount of your order. There is no red tape about this and no "catch" or "string" of any kind. We have not advanced the prices so as to make this allowance to you. The prices are the same to everyone. The values cannot be duplicated at the prices here given. The check is for you as an additional reduction. It is offered to New customers only. Each family is entitled to only one check.

### We Offer You Our Check on the Following Basis

If you order from \$5.00 to \$10.00 it has a value of 50c.

If you order from \$10.00 to \$20.00 it has a value of \$1.00.

If your order is for \$20.00 or more it has a value of \$2.00.

This check will more than take care of the average freight charges. On nearby shipments the freight might not be over the minimum of fifty cents.

### 32 Piece Set of Dishes Free

If you will send us an order for \$35.00 or more, then you can have, instead of the check, a fine 32-piece dinner set. This is a good quality set that retails for from \$5.00 to \$6.00. The color is under the glaze and will not wash off. It is a wonderful gift.

To make it clear these dishes are not given in addition to the check but in place of the check. You cannot use the check and get the dishes also. Only one set to a family. If your order does not amount to \$35.00 or more, get your neighbor to give you his order and then receive this fine gift absolutely free.

### Extra Prizes Given

See below a brief description of Extra Prizes given in addition to the above. They are valuable gifts. There are many more extra gifts not shown here. Write today for the "Contest Circular" showing full list of prizes and giving detailed information. Remember your own order automatically enters you in this contest.

## \$750 EXTRA PRIZES \$750

### Famous Kalamazoo Stoves, Ranges, Furnaces FREE

Everyone who sends us an order this year is automatically entered in this Special Contest. The winners will receive \$750.00 in wonderful prizes.

These prizes are the famous heating stoves and cooking ranges made by the Kalamazoo

Stove Company. We chose them because, as everybody knows, "a Kalamazoo Direct to You" means quality second to none!

More of these stoves are shown on page 48 of this book. The coupon on that page will bring you their new catalogue of 200 different styles and sizes, showing the stoves in their true sparkling colors. Be sure to send for it.

Also be sure to ask us for our Contest Circular that gives all the details of how to win a Kalamazoo stove FREE. Contest absolutely closes May 1, 1933—so send in your order promptly to get the full details. Remember, sending us an order automatically enters you in this contest. Duplicate prizes in case of ties.

# BANKS

that VOUCH for US

Here is a list of the banks with whom we do business. Anyone of these will tell you that we are reliable. Your own banker can refer to his credit rating books and he will tell you the same thing.

Continental Illinois Bank and Trust Company, Chicago, Ill.  
Terminal National Bank, Chicago, Ill.  
First National Bank, Chicago, Ill.  
Bank of Manhattan Trust Company, New York, N. Y.  
Iowa—Des Moines National Bank, Des Moines, Ia.  
Omaha National Bank, Omaha, Neb.  
Citizens State Bank, Page County, Iowa.  
Union Trust Company, Clarinda, Iowa.

# LOWEST PRICES

from WORLD'S LARGEST SEED HOUSE SELLING DIRECT to YOU!

Our Clarinda plant and main offices are shown above and our Chicago plant on the left. These large buildings, equipped with modern machinery, make possible our excellent service, high quality and low prices.

## TESTED QUALITY

Mr. L. C. Jorgenson is one of the country's best seed analysts. He secured his training from U. S. Government at Washington, D. C.

## Prompt Shipment—Quick Arrival

Our entire policy of business is to take care of every customer's order so he or she will be satisfied in every way. Both our Clarinda and Chicago plants are organized and equipped to get shipments out promptly. Freight service is improved and shipments roll to destination in short order.

We guarantee that all shipments will arrive safely and in good condition. If there is any sign of loss or damage just have your agent mark it on the freight bill, send the bill to us and we will promptly adjust the matter. Address all letters, orders and correspondence to Clarinda. We have no office at Chicago.

## Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

## Recleaned Seed

It will pay you to fully understand that our scientifically recleaned and specially processed seed is distinctly a superior product. When some dealers talk about recleaned seed they mean it has been run over a fanning mill with a couple of screens in it. That will help, of course, but much greater care and attention must be given to the average seed to make it desirable to sow.

In our cleaning plants we have some machines that are used just to get one particular kind of weed seed. Our equipment is modern, efficient, and we can do cleaning and special processing that is absolutely impossible for the average concern. You could afford to pay us a premium for such seed and still have much more economical and satisfactory seed. We do not charge you a premium, however, but give you scientifically recleaned seed at prices that are lower than many are asking for inferior quality. Judge seed by quality. Quality makes the value and our low prices make unbeatable bargains.

## GUARANTEE

We guarantee everything in this catalog to be as represented. We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge.

Our guarantee protects the buyer and is lived up to, so it means just what it says.

BERRY SEED CO.,  
Clarinda, Iowa.

## We Test to Know

The seed business is our only business, not a side line. We must ship good seed to our customers or our business will fail. We can't afford to guess at the quality of our seeds. We must KNOW.

Therefore, every lot of seed is tested with painstaking accuracy. The analysis shows us exactly what the seed is. The purity of the seed is known to one hundredth of one per cent. The germination is also found. The seed must be satisfactory or it isn't shipped.

We refuse to buy lots of seed because of some undesirable impurity or weak germination. Whoever sows such seed will regret it. You are always safe on our seeds and no matter what grade you buy you are guaranteed an excellent bargain. Every shipment we make has a tag on it showing purity and germination tests. You know what you've got because our tag gives you the facts.

PLANT the BEST  
QUALITY SEED  
for BIGGEST  
CROPS and PROFITS

# DIRECT BUYING

(The Sensible  
Thing to Do

## You Save Money on all Seeds

We eliminate extra profits. Our seed comes largely direct from the producing sections to our plant. From one section comes Red Clover, another Alfalfa, another Sudan, Sweet Clover, Timothy, Rape, etc. We reclean and assemble these stocks so that you can get at one place all the different kinds of seed you may need. All of this seed is scientifically cleaned, graded and tested. You get it in the way you want it and at a decided saving in price.

We have saved the American farmer thousands of dollars on our guaranteed quality seeds. We can save you good money this year. Join that mighty caravan of farmers that is turning this year to the World's Largest Seed House—selling farm seeds direct to farmers. Quality counts.

**CUTS OFF  
THE  
MIDDLEMAN  
AND  
SAVES YOU  
20% TO 30%**  
KEEP THIS EXTRA  
PROFIT FOR YOURSELF

## AN EXPLANATION of GRADES

There are some lines of seeds that naturally fall into different grades. We do not mix these altogether in one lot but divide them into grades. Thus the farmer who does not object to a little off color or smaller berry has an opportunity to get such seed at a considerably lower price. On the other hand, the man who wants only the best that money can buy will find that our best or World Brand grade is better than that which is generally sold as the best.

**World Brand.** A strictly A No. 1 Extra Fancy quality. Biggest berries, highest color and in every way the nicest seed. It will fully satisfy the most critical buyer. It's the cream of the crop.

**Dealers Fancy.** A very good quality. Fully equal to what is quite generally sold as the best. High purity and germination. Nice color and good sized berries. Very satisfactory.

**Planet Brand.** A grade that pleases the average farmer. Good dependable seed that serves in a very satisfactory way. Berries a little smaller. Not quite so smooth looking but an excellent value for the price.

**Star Brand.** Our cheapest grade frequently demanded when sowing for fertilizer. Gives surprisingly satisfactory results, especially in Alfalfa and Sweet Clover.

### Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted post-paid be sure to remit to cover postage. First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3½c
Zone 5	11c	5½c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds.  $9 + 18 = 27c$  total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

## OUR PRICES THE NATION'S LOWEST

Our seed prices have crashed to the lowest levels in history. Never before have our prices been so low. These quotations reflect the lowest valuations of the nation as a whole.

In some sections there is a shortage of some seeds. Often local dealers are quick to take advantage of such situations and boost their prices to you. When you send your order to us you get the benefit of the lowest prices in the nation. It takes quality, of course, to make real value. Quality considered, we guarantee our prices are lower than you can get anywhere else.

### Profit by Buying Early

We assembled large stocks at the low point in the market. Our customers get the benefit of the saving we made. The low prices that we have put on our seeds is bound to move them rapidly because everyone wants to save money. When these low priced stocks are sold and we have to buy more it may become necessary to advance some prices. By ordering promptly you are protected and assured of getting the absolute maximum in value for your money.

## HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list you have. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you are in a big hurry for your seeds mark your order Rush.

# LOT GRAND Sudan Grass

## LOWEST Price in History

\$ **1.25**  
PER BU.  
50 LBS.

**NEW CROP  
SEED**

### GROW IT THIS YEAR

#### A Most Profitable Crop

This valuable grass should be grown on every farm for summer pasture or extra hay crops. The price is so ridiculously low that all can well afford to sow it. Never before have you been able to buy the finest new crop re-cleaned seed at such a low figure. This is one of the greatest bargains in our Blue Ribbon Sale which is setting a new record for low prices.

#### Description

Sudan belongs to the cane family but is finer stemmed and a free stooler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

#### How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

#### An Extraordinary Bargain

Our price to you is less than the cost of production. The seed is all the very finest new crop. Some dealers carried over Sudan seed last year which will have lost considerable of its germinating power. You get double the value in our fine new seed. It has strong germination, high purity and is guaranteed free of Johnson Grass. We further guarantee that this is the lowest price at which you can buy this quality of seed.

When you sow Lot Grand you have the satisfaction of using the kind of seed that will give you the best assurance of success. It's easy to grow Sudan with this kind of seed.

We urge every one of our customers for the sake of better farm profits to start this year with this wonderful money maker. It produces enormous quantities of feed in a short time and it keeps right on the job, doing its best when heat and drought are killing your ordinary crops. Take advantage of an extraordinary bargain price by ordering now.

# BILLION DOLLAR GRASS

### An Enormous Producer

The popularity of this grass is ever on the increase. It is a variety of Millet also known as Japanese Millet. It is without doubt the heaviest producer of all millets, especially on rich moist soil. Grows 6 to 8 feet high. Produces as high as 26,000 to 50,000 lbs. of green feed per acre with seed production of 1,000 to 2,000 lbs. per acre.

Should not be sown until weather is warm, but will stand somewhat cooler growing conditions than Sudan. For that reason it is especially popular in the north, although it is grown throughout the entire country. Sow during May, June or July, using 20 lbs. per acre. Makes hay in 6 to 10 weeks.

#### Low Price for This Year

We are making this low price in face of a short seed crop this year. Have only a limited amount contracted to sell at this low price. Seed is all the best quality and guaranteed satisfactory. The fine feed value and heavy production of this crop make the crop in big demand. Order early to make sure of your supply.

It also can be used for pasture. May be mixed with Soy Beans or Cowpeas. If fed green start stock on it gradually. It is palatable and particularly valuable for dairy cattle, young stock and sheep.

\$ **1.10**  
PER BU.  
35 LBS.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,  
S. G. FOWLIE.

**SEE PAGE  
25 for  
LOWEST  
PRICES  
EVER  
MADE**

# SOY BEANS

**Save by Buying  
DIRECT**

## A Fine Money Making Crop

It is truly amazing how soy beans have swept the country. Comparatively a few years ago they were an experiment. Now you see them everywhere. The farmer who loses out on a crop of clover no longer does without hay. He plants Soy Beans and harvests a heavy crop of fine hay in the fall. If small grain doesn't pay him he plants soy beans for a seed crop and harvests 20 to 30 bushels of beans per acre. In our part of Iowa farmers plant soy beans after the small grain is off and take another hay crop or plow under the stand for soil building. It's no wonder the crop is popular.

## The Lowest Prices Ever Made

Now you can buy extra fine quality, graded, new crop beans at exceedingly low prices. Our Soy Bean Bargains appeal to all who appreciate the economy of high quality. All our stock is clean and bright. The small beans and the split ones are removed. It is a product greatly superior to what many sell. It is real seed stock and goes much further. We are pricing our seed at very low figures. Every variety is a bargain. See page 25 for money saving quotations.

## How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows  $1\frac{1}{2}$  to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

## Varieties

**Dunfield.** Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

**Manchu.** An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

**Illini.** Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

**Wilson Black.** A hay bean. Medium late. Small black seeded. Fine stemmed. Very nutritious. Very much in demand as a hay bean. 120 days.

**Black Ebony.** Grows erect and bushy. Fine stems, holds leaves well. Matures seed 120 days. Very popular.

**Virginia Hay bean.** Makes large growth with enormous yields of hay. One of the best beans for poor land. Seed brownish and smaller than the average. Requires less seed per acre.

Prices on Pages 24-25

## COWPEAS

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. All our seed stock is fine. See quotations page 25. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

## Varieties

**Whippoorwill.** Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color. We recommend it highly.

**New Era.** If you wish the earliest of all varieties select this one. Good for northern states or where late planting is necessary. May be planted after small grain for plowing under. Good soil builder. Smaller seeded than Whippoorwill. Use  $1\frac{1}{2}$  bu. per acre for broadcast seeding.

**Mixed Cowpeas.** Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All good re-cleaned stock. We have a big call for mixed cowpeas.

## CANADA FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to  $1\frac{1}{4}$  bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do.

Our seed is high quality, genuine Canada Field Peas. Crop short but our prices low. See page 25. If you are going to be short on feed next spring we recommend this crop very highly.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased. Yours truly,

Edwardsville, Ill.

H. C. STRASEN.

# LOWEST PRICES

# SEED CORN

## 96% GERMINATION

### It Pays to Plant Improved Seed

You depend on corn for the biggest part of your income. It is your most important crop. The seed has a great influence on yield. You can well afford to spend money for seed as it is a small item. At the very low prices we have on improved and graded seed corn it means an expenditure of around 12c an acre. Surely your most important crop is worthy of that expense. Even with corn at low prices an increase of only one bushel per acre pays back that cost.

### Why Our Seed Is Better

Our customers report increases in yields of 10 and 20 bushels per acre. That doesn't happen by chance. Our seed stock is of known heavy production under general farming conditions. The seed selection is from fully matured, well formed ears. It is quick high germinating stock. This seed is then shelled and graded and laboratory tested. Less than half the stock we gather for seed finally gets in the seed we ship. It is real seed stock.

We do not breed for show corn but we strive to get the largest number of bushels of good sound merchantable corn per acre. You'll find plenty of show ears in your field next fall, but what will please you most is the heavy yield per acre.

The description of the different varieties here given will show you that we have corn for all sections. Medium late, medium early and extra early. We have seed corn for you and when you consider the quality of seed stock we offer you will agree that our price is very reasonable. See page 25.

## CLARINDA BIG PERFECTION

This is the largest eared and heaviest producer of all our open field pollinated yellow varieties. A splendid sort. Just a little later than Pride of Iowa. Ears not quite so uniform, but larger. Big thick ears with large kernels. Deep golden color. Broad thick deep grains. Large strong germ. Vigorous grower. Maturity around 110 to 115 days. We don't believe there is another variety to equal it. It is being grown well up into Iowa and all points east and south. It sure is a dandy corn. If you want to show your neighbors how to grow a real crop of corn plant some Big Perfection.

Fairfax, Mo.  
Oct. 26, 1931.

Dear Sirs:

Each year for 25 years I have bought seeds from the Berry Seed Company. I have found the quality of your seeds equal or superior and the price always lower than any I could obtain elsewhere. I also know you have some extra good seed corn.

Your customer,  
FLOOD L. FELLOWS.

### SEED CORN GUARANTEE

**30 Days to test it—Your money back if not satisfied. 96% or better germination**

We take great care in the selection and preparation of our seed corn. It is all tested and labeled when shipped. You have the privilege of examining it and retesting it in any way you wish. If you do not find it as represented, or if for any reason you are not satisfied you may return it, and your money plus transportation charges will be promptly refunded. We abide by your decision. There are no strings to this guarantee. We say what we mean and mean what we say. You must be satisfied.

**BERRY SEED CO., CLARINDA, IOWA**

## PRIDE OF IOWA

One of our heaviest producing yellow. A cross between Reids Dent and Legal Tender. Gives a larger ear than Reids without the tendency to become flinty. Grains deeper and wider than Reids but not quite so smooth. Rather a small cob. Has a heavy shelling percentage. Average maturity around 110 days. Small shank, easy to husk. Ears are well filled.

We have reason to be proud of our Pride of Iowa and you'll be proud of a field of it on your farm. Our shelled stock is A No. 1. If you want some ear corn in this kind we can supply something extra nice. See page 8.

Shelled Page 25

### BERRY'S IMPROVED REID'S DENT

A superior strain of a well known variety. Solid compact ears 9 to 13 inches long. Grains quite deep and set close. Straight rows well filled. A great improvement over the old Reids. Rich golden color. A small cob and shank. High feeding quality. Maturity around 100 to 110 days.

### IMPROVED LEAMING

A good producer on all soils. A tried and tested variety for over a century. Well filled ears. Deep broad grains. Medium sized red cob. Shells out well. Often used for ensilage in northern states. Quite early. Matures in 110 to 120 days.

### LEGAL TENDER

A pure yellow corn with deep grains and small red cob. Ears extra sized. Has yielded 90 bushels per acre for John Hess in Central Iowa. Produces exceptionally well. Abundant foliage. Excellent for forage. Easy to shuck. A variety that will please you. Around 110 days' maturity. See Page 25 for Prices

# LARGER YIELDS MAKE BERRY'S SEED CORN A WISE INVESTMENT

## Medium Early Yellow

**Berry's Golden Dent.** An early yellow dent, 90 to 100 days. Large ears for early variety. Fairly smooth. Well filled. Similar to Reid's Dent, but earlier. Sixteen to twenty rows. Much heavier yielder than Pride of the North. Medium height stout stocky stalks. This variety is easily a leader in its class.

**Iowa Gold Mine.** Another fine medium early variety. About a 100 day corn. Deep yellow grain, small cob. Always gives satisfactory results. Sold under various names by different seedsmen. Those wishing a medium early heavy yielding corn will make no mistake in selecting this variety.

## EARLY YELLOW DENTS

**Pride of the North.** Especially recommended for northern customers and those wanting early feeding corn. Maturity about 90 days. One of the finest pure yellow early dents. Medium sized solid ears. Stands up well and yields surprisingly well.

**Minnesota No. 13.** Also in the 90-day class. Very popular; eight-inch ears, often two on a stalk. Stalks quite leafy. Does well even under unfavorable conditions. One of the best producers in its class. We always have a big demand for this.

## Other Excellent Early Types

**Yellow White Cap Dent.** We recommend this highly. A 90 day type. Nice deep kernels. Sides medium yellow. Caps or tops of grains white. One of the finest early feeding varieties in existence. The kind you get enthusiastic about. Heavy producer of fine solid corn. You will be exceptionally well pleased with this one.

**Golden Cap.** Grains a cherry red color with yellow top or cap. Very fine appearing. Yields very heavily. Grain a little softer than the average. Ears well filled. Matures up to 100 days. One of the best early feeding corns you can plant. Great favorite with stock men. Adapted to most any section of the corn belt.

**White Cap Red Dent.** Similar in nearly every respect to Golden Cap except color of cap is lighter and a little earlier.

**Up to-Date Calico.** This is the famous "speckled" corn that has been popular for so many years. A fine feeding variety. Various strains of Calico on the market. We consider this the best. Excellent yielder, good sized ears, medium deep grains. Matures in 100 days. We seldom have enough of this variety to fill demand.

Prices  
Page  
25

## SEED TREATMENT

### Semesan Jr. or Merko

These are dry treatments that can be applied to seed corn anytime before planting. They give assurance against losses such as seedling blight and root and stalk rots. Increases germination, permits earlier planting and reduces seed decay. One pound treats 6 bushels. Price, 1 lb., \$1.50; 5 lbs., \$7.00, express paid. That means it costs only 4c an acre. It pays to use it. We consider either Merko or Semesan, Jr., equally satisfactory.

**CORN**  
100 BU. PER ACRE

**XX**

DOUBLE CROSS

**HYBRID**

## KRUG'S DENT

Ranks along with our Big Perfection and Pride of Iowa in yield, but is 10 to 15 days earlier. A four-year test in Illinois proved it the best yielder of 118 varieties. It is a cross of a smooth Reids Dent with Gold Mine. Ears somewhat smaller than Reids, but lots of them. Exceptionally firm and solid. Rich yellow color. Combines early maturity with heavy production. We recommend it highly. We do not believe there is another variety of equal earliness that will yield like our Krugs Dent. Our Hybrid is the only exception.

This scientific development in Corn is bringing heavy increases in yield. Tests in Iowa show increases of 25 bushels per acre. 10 to 15 bushels per acre increase can be readily expected under average conditions. Yielded 127 bushels in one test compared to 100 bushels for the best open field pollinated. Compared with the kind of corn that many farmers plant it should increase yields 20 to 30 bushels per acre.

## HOW IT IS DEVELOPED

First many different strains are inbred by self fertilization. This inbreeding is all done by hand labor and continues from 4 to 6 years. The best inbreds are then crossed. The next year the best crosses are crossed, giving a double cross inbred Hybrid. In crossing, one kind is detassled so it is fertilized from the other inbred in adjoining rows. The seed is gathered only from the detassled rows. This is good for seed only one year, but with increases such as this gives it pays to get new seed each year.

There is a great difference in Hybrids. Any Hybrid is only as good as the inbreds that are used. Practically every breeder of Hybrid Corn uses different kinds of inbreds. Therefore these various Hybrids have distinct difference.

Our XX Hybrid has a deep yellow color. The stalks are very erect. That is an outstanding characteristic of our Hybrid. You find practically no barren stalks in the field. Many have two ears on them. Our customers report as high as 5 ears on a stalk.

Another important feature is the adaptability of our Hybrid to such a large range of country. It can be planted much further north or south and east or west, than ordinary corn. Matures in 105 to 110 days.

## AN EXCELLENT INVESTMENT

At first thought the cost of Hybrid may seem high. Figure it down to the cost per acre and compare that with increases in yields that can be reasonably expected. It proves to be money wisely spent.

Our XX Hybrid seed corn comes to you treated in advance with Semesan Jr. The seed is not as nice in appearance as ordinary corn. The crop is different from the seed.

### First Quality graded stock

1/8 bu., 50c; 1/4 bu., 60c; 1/2 bu., \$1.10; 1 bu., \$2.00; 5 bu., \$9.00.

### Second Grade seed stock

1/4 bu., 50c; 1/2 bu., 80c; 1 bu., \$1.50; 5 bu., \$7.00.

## MONEY MAKING WHITE VARIETIES

### St. Charles White

This is the famous white ensilage corn that produces such enormous crops. Clear white deep grains of large size, medium rough type. Red cob. Large ears. Stalk growth is quite tall. Has broad succulent leaves. Used extensively for ensilage even in the northern states. Will yield 40 to 50 tons of green feed per acre. Makes a good milling corn on account of its clear color. It is a phenomenal producer in great demand. Place your orders early for St. Charles. Our seed stock is excellent high-testing and well graded.

### BOONE COUNTY WHITE

A large white variety that has exceptional merit. Meets with immediate favor wherever it is introduced. The ears are a little larger around than the White Wonder, but not quite so long. The pearly white kernels are large and deep. Pure white cob. Strong germs and a vigorous grower. Matures in 115 to 125 days. We recommend this for southern Iowa and all points south or wherever a corn of this maturity can be grown. The big ears of Boone County White fill a wagon box quickly. It is an excellent variety and our seed is of fine quality.

### SILVER KING

A very early white also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

### EXTRA EARLY VARIETIES

#### Minnesota King

A cross between a dent and a flint. Large, broad kernels, slightly dented. Deep, golden color. Eight rowed. Withstands very unfavorable conditions. This, in our opinion, is one of the most valuable of the extra early varieties.

### LONGFELLOW FLINT

Fine 8-rowed yellow flint. Long, straight, slender ears. Large, wide kernels. Small cob. Very prolific.

### SILVER TRIUMPH

An excellent white flint. One of the best. Long ears, often two on a stalk. Grows good sized stalk. Can be planted close and produces a lot of corn per acre. Fine for those who want real early yield. Can be planted quite late.

### SANFORD'S WHITE FLINT

Very similar to Silver Triumph.

## WHITE WONDER

Some ears are 12 inches long and over and proportionately large in circumference. They are big fellows. Makes good solid ears, well filled and not flinty. Good sized grains, fairly rough. Strong vigorous stalks many having one large ear and one small one. Out-yields any white corn we know of. Maturity 115 to 120 days. We have seen it outyield Reids Dent 31 bushels going to 92 bushels per acre.

Usually exceeds the expectations of the grower. It sure is a wonder for production.

**LOW PRICES  
CONSIDERING  
BIG YIELD**

**SEE PAGE

REDUCED  
QUOTATIONS  
ON ALL  
VARIETIES**

## \$ilver Mine

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe, sure and profitable kind to grow. It makes friends everywhere it goes.

## HOW WE SELECT OUR FAMOUS EAR CORN

Mr. A. R. Gorton, who has been chief of our corn division for many years, personally superintends the selection of our ear corn. Only the finest well formed, fully developed true to type ears are selected. He picks the cream of the crop. When you get a crate of ear corn you have something to be proud of. Each crate contains 70 lbs. of fine ear corn. Our shelled corn, of course, comes from the same fields and should produce equally well. Those who want to see it in the ear and know exactly the type they are planting will be delighted with this seed. We sell thousands of bushels of our seed corn in the ear.

The low prices we have on it this year makes the acre cost very low and certainly makes it a wise and profitable investment.

### Extra Fine Ear Corn This Year

Our supply of extra select ear corn is the finest we have had in many years. Beautiful, well formed, fullkerneled ears that are a delight to every judge of good seed corn. Bushel crate, \$1.50; 5 crates, \$7.00.

Shipment is guaranteed to reach you in good condition. It is sold subject to any test you want to put it to. You can return it and get your money, plus freight, refunded if you are not completely satisfied and fully pleased.

We can supply our extra select ear corn only in the following varieties: Big Perfection, Pride of Iowa, Krugs Dent, Reids Dent, Improved Leaming, Legal Tender, Iowa Gold Mine, Silver Mine, Boone County White and White Wonder. All other varieties are available only in shelled corn.

# CANE

## A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

## How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

**Early Amber.** The kind most generally grown and of great value because of its splendid growing qualities.

**Early Orange.** Heavier stalks more abundant leaves. Seed head more compact. Heavier yielder but a little coarser.

## CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

**Ames Special Sorghum.** An improved type of the Amber. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

**Silver Tip.** More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with expert sorghum makers. Produces lots of syrup of a superior variety.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 10c per lb.; 50 lbs. or more, 9c per lb.

## GROHOMA

### Cross Between Sugar Cane and Kaffir

Very deep rooted. Marvelous drought resister. Prolific stooler. A seed every 12 inches in a row will make a good stand. That means only 1 pound per acre. Regular seeding 6 to 8 lbs. High-feeding value. Highly recommended.

Price, Postpaid, 1 lb., 20c; 5 lbs., 50c. See page 25, quantity prices.

# BERRY'S Special GRAIN and HAY CROPS

## KAFFIR CORN

A sorghum grain crop. Used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure, 10 days to 2 weeks then thresh. Our seed is high germinating. Prices are very low on both Red and White Kaffir.

SEE  
PAGE  
25  
for  
SALE  
PRICES

## Feterita

The greatest drought resister of all. Earlier than Kaffir. Has a higher protein content. A very heavy protein producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Handle like Kaffir. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs. You'll like this leader among grain sorghums.

## PROSO

A variety of Millet grown almost exclusively for seed. Very prolific producer. Seed larger than other Millets. Used in some countries for human food. Equal to Barley in feeding pork. Extra fine poultry feed and used in nearly all bird seed mixtures. Crop is also known as Russian Wheat or Broom Corn Millet. Matures very early, 60 to 70 days. Yields up to 60 to 70 bushels per acre. Excellent cash crop. Sow after weather is warm. Sow 40 to 50 pounds per acre. Drill in close rows. Demand for seed greatly increased in past two years.

## BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture. Does well on all soils excepting wet land. We have two varieties. Both are excellent yielders. Our seed is thoroughly cleaned and guaranteed to be satisfactory in every way.

**Japanese.** Rich dark brown. Strong grower. Earlier than most varieties. In big demand.

**Silver Hull.** Thin shelled. Silver grey. Medium sized grain. Makes nice flour.

## MILO MAIZE

Similar to Kaffir. Earlier. Stalks more pithy. Requires less moisture. Fine feed. Handle like Kaffir. Color white. Excellent yielder. Our seed high testing stock. Prices low.

### Broom Corn

Grown for straw in the seed heads. 4 to 5 pounds plants an acre.

**Improved Standard** — Excellent straw of good strength and stiffness.

**Dwarf Evergreen** — Best for dry conditions. Price, 1 lb. 20c; 5 lbs. 75c postpaid.

# LOW PRICES on SELECTED, TESTED

## SEED OATS

### Better Seed Pays

When you ask some farmers about better seed oats they will tell you that oats is their poorest paying crop and that they can't afford to spend money for better seed. Did it ever occur to you that is one reason why oats are a poor paying crop on many farms? They have just let the seed run down to where every acre seeded to them is a money losing acre.

On the other hand there are hundreds who have learned that seed does make a big difference in yield and that Berrys Seed Oats excel in production. We handle northern grown stock. Several of our varieties are grown in Montana. All of our seed is thoroughly cleaned and graded. We give you those big plump meaty kernels from heavy yielding strains of best producing varieties. We pay a premium for this seed stock and lose a considerable portion in grading. Such seed is certainly worth its cost.

### Change Seed Often

It will pay you to get such new seed stock every 3 or 4 years so you can get the necessary production to make the crop pay out. When markets are low you must have a big yield in order to avoid loss. We have the kinds that are profitable to grow.

## RUSSIAN GREEN

An extra good producer. Early maturing being only 4 days later than the extremely early Iowa 103. Color, yellow cast with green tip. Not quite as nice in appearance as a pure white variety but generally excels in production. Thin hull, lots of meat. High feeding value. Very resistant against rust. Once established in a neighborhood it meets with immediate favor. The first crop is often sold entirely for seed. We recommend it highly as it does well even under unfavorable conditions. Supply limited. Order early.

## Swedish Select

Our regenerated stock is Montana grown. A great improvement over ordinary strain. It is a revelation in production. Yields reported up to 100 and as high as 140 bushels per acre. Large white plump meaty kernels. Straw fairly tall. Stands up well. Color white. Medium maturity. Large sprangled heads, heavily laden with rich grain. It is a magnificent variety and an excellent money maker. You certainly will be pleased with it. Very popular with our trade. Always in good demand. Seed Guaranteed to satisfy.

Hall, W. Va.  
Dear Sirs: I have been buying seeds from you for a number of years for my own use and for the Boulder Farm Club. The seeds have always given entire satisfaction, and we have saved over one hundred dollars by ordering from you.  
Very truly yours,  
Ira L. Dadisman

## BIGGER YIELDS

LOW PRICES on  
PAGE 25

## GREAT NORTHERN

Big heavy meaty oats. Has the largest grains and is the heaviest producer of all our varieties. Kernels nearly twice as large as the average grown in this section. Straw is stiff and quite tall. Color white. Quite early for so large a variety. Weighs out very heavy. Prolific stooler. Strong plants. Has produced 137 bushels per acre. Its a money maker. You should be able to show your neighbors something about growing oats with such a variety. Our seed is Montana grown, carefully cleaned and thoroughly graded.

## NEW ALBERTA

Another of the large heavy white types. Tall stiff straw. Kernels a little plumper than Great Northern but not quite so long. A great favorite in the north and widely grown by our customers throughout the corn belt. Medium as to maturity. An extra fine quality. Lots of meat. Comparatively thin hull. Seldom lodges. A rapid vigorous grower and a very heavy yielder. The first crop of these wonderful oats in a neighborhood can generally be sold at a good premium for seed stock.

## FULGHUM

Heaviest producer of the early varieties. Outyielded other varieties 12% to 17% in a seven year test. Very resistant against smut. Where Khersons showed 25% to 40% smut in a smut inoculated field the Fulghums were practically free. Straw medium short spreading at lower joints. Medium sized kernels golden yellow color. One of the best kinds for rich land and outyields others on thin soil. Should be sown early. Extra fine, heavily re-cleaned seed stock. An exceptional variety that is sure to satisfy.

## SMALL GRAIN TREATMENT

### Ceresan Treatment for Small Grains

A dry treatment. Very effective. Controls bunt or stinking smut of wheat, stripe disease of barley, loose and covered smuts of oats and barley, and covered kernel smut of soy beans as well as seed borne smuts of rye. Does not injure grain drill. No water needed. Use only as a dust. Takes 2 ounces per bushel for wheat, rye and soy beans, 3 ounces for oats and barley. Easy to apply. Economical to use.

Price, 1 lb., 85c;  
5 lbs., \$3.00;  
25 lbs., \$12.50;  
Must be shipped  
by express. Poison,  
not mailable.

# EXHIBITION SPECIALS

SEED

OATS

GREAT

VALUES

## NEW IOWAR

A wonderful early white oat. Originated from a sixty day variety. Outyields both Iowa 103 and 105. Grows a somewhat longer straw. Thin hull. Grain has a small black awn. Medium size. Rapidly replacing other early white types. If you want a better yielder having higher feeding value and a little longer straw choose Iowar. Our seed stock is extra nice. See page 25 for prices.

SEE PAGE 25 for PRICES

## LOGGOLD

The best of the early yellow varieties. Extra heavy yielder having outyielded early Khersons as much as 70%. Very fine for rich land. Color yellow thin hull. Color yellow. It clicks out the extra profit making this year. Low cast with green bush. Sell your crop for seed. You invest wisely when you buy Loggold.

SEED TREATMENTS

PAGE 10

**BUY BETTER SEED For LESS MONEY**

PRICES on PAGE 25

## WHITE KERSON

An extra early white. A heavy producing strain of an old favorite variety. Thin hulled. Strong of richest soil. Thin nurse crop. Fine for a variety of sowing. As you sow, so shall you reap. Seed makes a great difference in yield. Let us ship you something extra nice in White Kherson.

SEE PAGE 25 For NEW LOW PRICES

## EARLY CHAMPION

This is an improved strain of a famous early white variety. Sometimes called the "Fourth of July" oat. A good yielder and a fine nurse crop. Stands up well. Adapted to the richest soil and one of the best producers on thin land. While they will not yield as heavily as our later varieties they are a good variety to select when extreme earliness is desired. It is an extra profit maker.

CREAM of the CROP

Very early. Excellent for rich land. Straw very strong. Best of a nurse crop. Our superior strain is a fine yielder. Medium sized light variety. A better producer than most early varieties. An old standard variety kept up to a high stage of production by proper seed selection. Our seed stock is first class. Our new low prices saves you money. See page 25.

BARGAIN PRICES

## SUPERIOR IOWA 105

## SILVER MINE

Our strain of this variety surely deserves the wide popularity it enjoys. It is a superior quality grain, combined with heavy yielding ability. A white oat with a soft hull. Meaty kernels. Medium early. Medium length strong straw. Our northern seed weighs out heavy. Grow some of these extra fine feeding oats. Profit by these extra fine feeding oats. Profit by their heavy production. They are adapted to a wide area.

## New HULLESS

### BIG YIELDER—NO WASTE—FINE FEED

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grain similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to assure full protection against smut we treat all our Hulless oats with copper carbonate to destroy any smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have new low prices on these oats this year.

# BARLEY

## Big Increase in Demand

Barley, the heaviest producer of small grain crops, has again stepped to the front. It is back on the Board of Trade and at prices sharply advanced. There is especially a demand for malting barley. Our Velvet is one of the finest malting kinds and is in big demand.

Barley is as fine a grain as you can feed. It is rich in bone and muscle building elements. It develops large, strong, healthy animals in quick time and at reduced costs. Records of forty years have proven it the heaviest yielder of all grain crops, corn alone excepted. Barley is one of the best nurse crops for grass and clover. Stands up on rich ground. It is ready for harvest the latter part of June or early in July.

**LOWEST  
PRICES  
ON  
HEAVIEST  
PRODUCING  
VARIETIES**

**WHITE  
HULLESS**

### Has no Beards and no Hulls

A remarkable grain. Kernels resemble wheat in size and shape but lighter in color. Weighs out around 60 lbs. to bushel. It is sold however on basis of other varieties, 48 lbs. Straw is more leafy than other varieties. It is frequently cut for hay. Stands up well. It is particularly drought resistant. Heavy producer, yielding up to 40 to 70 bushels per acre. It is entirely free from beards.

We consider it fully equal to corn in feeding value. Exceptionally good for hogs and poultry. A fine plan is to feed both barley and corn. That gives a combination of nutrients superior to either crop fed alone.

The crop is easy to grow. Sow around 2 to 2½ bushels per acre. Handle like any small grain crop. The first crop in a neighborhood can often be sold at a premium for seed. Get acquainted with this remarkable profitable grain crop.

# VELVET

The KIND With SILKY BEARDS

Our Velvet Barley is a revelation. It looks like ordinary barley but is distinctly different. The beards are there but those bothersome sticky barbs are gone. The beards are as smooth as silk. It's just as pleasant to handle as a beardless variety and you get the protection of the beards.

This Barley is of the best malting type. Decidedly superior to the average because its resistance to disease assures a better quality grain. For feeding or malting it is extra fine.

In yield it ranks at the top. Most farmers reporting on it say it is the heaviest yielder they have ever grown. The straw is even stiffer than the average. It is very resistant against spot blotch disease. Barley ranks next to corn in the number of pounds of grain produced per acre.

Our Velvet is adapted to a wide area. With the introduction of this variety many farmers are changing from oats to barley. It is proving a better nurse crop, a heavier yielder and an earlier maturing crop.

You will receive a very high grade shipment of seed when you order our Velvet and you will be starting a more profitable variety of grain.

**A VERY POPULAR VARIETY**

## BERRY'S Improved Wilt Resistant FLAX

### Berry's Wilt Resistant Flax

**The Best Paying Small Grain Crop.**

The United States grows only half its flax seed requirements. Farmers really get tariff protection on it. It has held up in price better than other crops. The wise farmer will put part of his acres in flax this year.

Flax is not exclusively a new land crop. The reason flax has not done so well on old land was because of a disease known as Wilt. Now we have a Wilt Resistant Flax and the crop can be grown with greater profit than other grain crops on old or new land.

### How to Handle

Sow as early as possible or about when you sow other spring grains. Flax prefers clean land. On foul land delay seeding and harrow to kill weeds. Requires a firm seed bed. Sow 25 to 35 lbs. per acre.

Flax makes the finest nurse crop obtainable for grass and clover seedings. Yields from 10 to 15 bushels per acre may be reasonably expected. Thresh with ordinary grain separator.

Do not sow ordinary Flax. Your chances are too great. Our Wilt Resistant Flax assures you of the highest degree of protection. It is a heavier yielder and more profitable than any small grain crop.

## ODERBRUCKER

Also known as Wisconsin 55. A standard malting barley. This, in our opinion, is the heaviest producer of its type by 5 to 10 bushels per acre. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. Our strain of Oderbrucker will please you. You can't afford to go on with low yields on small grain. Better seed will help you out. This fine variety of this profitable grain produces more wealth. Discard poor seed. Invest wisely in better stock. Our seed is fine quality, bright and clean. We have kept this old standard variety up to a high state of production by proper seed selection. You will find it to your interest to use seed of this character.

Danese, W. Va.

Dear Friends:

I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,  
WATSON COLE.

**See Page 25 for New LOW PRICES**

# SPELTZ

## NORTHERN GROWN

### ALSO CALLED EMMER

**Great Drouth Resister. Practically Rust and Smut Proof. A Heavy Producer. Extra Rich Feed**

This remarkable grain crop is really a type of wheat. The kernels are smaller and the shuck clings to the grain instead of becoming separated in threshing. The grain is somewhat softer and there are generally two grains in a shuck. Both shuck and kernel make excellent feed.

The stems of a speltz plant are pithy instead of hollow. It is unusually strong. Heads are compact and heavily set with grain. Leaves are velvety. It is a wonderful drought resister and in dry sections will outyield oats and barley. Matures very early and is grown from Canada to Texas and east and west across the continent. Its freedom from rust and smut makes it especially valuable when these diseases cause heavy loss. Speltz is a bearded grain.

You will find speltz a fine nurse crop. Its heavy yields, earliness and high feed value combine to make it a very satisfactory grain crop. Our customers are introducing the grain into all parts of the nation. The first grower in a neighborhood generally has the advantage of selling his first crop for seed.

**PRICES  
ON ALL  
SEED GRAINS  
SLASHED**

**SPRING  
WHEAT**

**NORTHERN GROWN**

### The Famous New Marquis

An early, beardless heavy yielding variety. Earliness is very important in getting a good crop of spring wheat. New Marquis is a week to ten days earlier than the average. Using northern grown seed also gives earlier maturity and a much better quality of grain. Our New Marquis is all the finest northern grown recleaned and graded seed.

Our New Marquis has a plump fat kernel, dark red in color and harder than most. It is one of the finest, milling wheats grown. Has more gluten, better color and higher absorption. In yield we consider it easily 5 to 10 bushels per acre better than others. Being beardless it is pleasant to handle. Heads are not so long but heavy. Straw fairly short. Stands up well.

Buy wheat like this, and get some profit from the crop. Order seed now. Sow it early. You'll find that it certainly does pay to use real high quality seed such as we will ship to you.

### Start Growing Speltz

Show your friends what this crop can do. Sow  $2\frac{1}{2}$  bushels per acre. Set your drill about as for oats. Sow as early as possible. It stands considerable frost damage. Thresh as for oats but not too close. Cut before it is dead ripe. Cut earlier if you want it for hay. There is nothing difficult about growing speltz.

Consider these facts. Speltz is a hardy crop; a heavy producer; a rich nutritious feed, does not lodge, makes a fine nurse crop; is drought and disease resistant and is a most desirable crop. Our seed is fine and prices are at new low levels.

We have some very fine speltz seed this year at low prices. Now is a fine time to get started with this grain. Send orders as early as possible.

GRAIN**

**SEE PAGE  
25**

## Northern Grown SPRING RYE

This is a distinct variety. Strictly a spring grain crop. It is grown for grain, pasture, and hay. No doubt this triple usage is why the crop is so popular. The grain is practically the same as winter rye. It is a good yielder of grain. Good length straw. Sometimes used with Canada Field Peas for hay. Wonderful producer on good land and the best small grain for thin soil. Early seeding gives best result but may be sown later than most grains if necessary. Sow around 2 bushels per acre.

Rye makes a very fine feed as pasture and grain. Helps out on the early spring feed problem. We try to figure out the seed demand so we will have enough for our trade without any to carry over. Nearly every year we underestimate the demand so we ask you to order your spring rye early. It is a crop that we are sure will please you. It is a money maker and our prices on this northern grown high quality seed are very reasonable. See page 25.

### Winter Wheat

We have some extraordinary varieties of winter wheat for fall seeding. Some of them are guaranteed to outyield your own stock. Along in July we publish a smaller bargain catalog describing and pricing winter wheat and also Alfalfa and other seeds for fall sowing. If you fail to get a copy of it be sure to write us for it. It will save you money.

Palmyra, Mo.  
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,  
W. A. Rinehart.

**THE MORE YOU BUY - THE MORE YOU SAVE**

# CROPS of SPECIAL VALUE MILLETS

## BLUE RIBBON MONEY MAKERS

Our forage crop varieties are all selected with our customers' interests in view. You want the kind that will make you the most money. In order to get that you must have heavy producing strains. The seed must be carefully cleaned and graded. It must test high in germination. You get these features on every shipment we make. Nothing is left to chance. Accurate tests are made. It is to your advantage to buy such seed.

## DWARF

## Marvelous Hog Pasture

This crop will help you materially in cutting the cost of producing pork or mutton. These animals, especially when young, need plenty of protein. That is the most expensive of all food elements. Rape is exceedingly rich in protein, analyzing 37% digestible protein.

Its yields are sensational. On rich moist land it will produce as high as 24,000 lbs. of green feed per acre. Rape is used as a pasture, although if mixed with Millet can be

cured for hay. The cost of seeding is very low. The seed is cheap (see page 25). It only takes 6 to 8 lbs. per acre. It can be pastured in 6 to 8

weeks after seeding. Sow any time from oat seeding until early July.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. Our seed is genuine Dwarf Essex, which is the only kind to sow. 5 lbs. postpaid, \$1.00. See price list.

Friends; if you really knew the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it. Pick out a fairly rich plot and sow some this year or sow in corn at last cultivation. You'll be amazed at the results the crop will give you.

## ESSEX RAPE

Scotia,  
Nebr.  
Dear  
Sirs:  
My  
father  
started  
buying  
seeds from  
you in 1898 and

I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,  
CHAS. KEOWN.

## VETCHES

## Spring Vetch

An annual variety having much the same characteristics as peas. Does well where Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

## SAND OR HAIRY VETCH

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See pages 24-25.

# BARGAIN PRICES SEED POTATOES

## Northern Grown Seed Stock

Every large and experienced potato grower knows that he gets his heaviest yields and finest quality by using northern grown seed. Most of them get new seed every year. Many experiments have proven this to be profitable. Minnesota seed has done the best of all.

We handle only Minnesota Seed stock. It is all graded and inspected seed. All shipments are guaranteed to arrive safely and to show up to your satisfaction. Mail your orders early. Shipment will be made as soon as weather conditions make it safe.

### EARLY RED RIVER OHIO

Our seed of this variety is fine. They mature extra early. They are good keepers and money makers. Our stock comes direct from the Red River Valley. It is real seed. Planting such seed gives increases of 25% to 100% over most home grown potatoes. The quality is distinctly superior. There is a better demand for such potatoes, and much better profit in growing them.

Our Early Red River Ohios have a light pink skin. Flesh is pure white. Produces good sized uniform tubers. Eyes are near the surface. Very little waste in peeling. Vines grow upright. Potatoes grow in a clump. Easy to dig. Our northern grown seed matures about two weeks earlier than southern stock, giving you the advantage of earlier markets and better prices.

### BERRY'S GENUINE IRISH COBBLER

Our Cobblers are one of the finest potatoes you can grow. They are in a class by themselves. Enormous yielder. Well formed. Finely flavored. Skin and flesh white. Cooks dry and mealy. Greatly superior to the mushy kind. A splendid keeper. Tubers are large, rather round with some oblong. Smooth skin with deep set eyes. Vigorous, thrifty growers. Medium early.

You may have grown Cobblers before but we feel sure you have never raised any equal to these. They are wonderfully popular. You don't have to pay long prices for some fancy variety to get an extra quality potato. Grow some of Berry's Genuine Cobblers and you'll have something to brag about.

### LATE VARIETIES

#### Banner

A superior variety of the later type. Roots deeply in dry season. Thrifty grower and a remarkable drought resister. Produces smooth plump handsome tubers. Beautiful creamy white. Eyes strong and on the surface. Skin slightly netted. Cooks quickly, dry and mealy. Shape a little oblong and slightly flattened. As nearly blight and rustproof as can be. A splendid keeper and enormous yielder. Medium late in maturity. Very popular. We know you'll like them.

### BERRY'S IMPROVED BONANZA

Greatly improved in hardiness and yield. A very high quality potato. Reddish skin, very white flesh. Firm grained, very dry and mealy. We consider this the most desirable main crop variety. Best yielder, keeper and shipper. Vigorous dark green vines. Withstands lots of heat and drought. We sell many carloads of this variety and recommend it highly. Excellent for market or home use. Medium early maturity. It sure is a dandy variety. Be sure to include it in your order.

### CARMEN No. 3

A very heavy producer. Practically every potato of marketable size. Both skin and flesh are white. Eyes few and shallow. Excellent table qualities. No hollow hearts, and no dark or hard spots. If you wish a white skinned potato of the late type you will find this a very profitable variety. It sure is a money maker.

### RURAL NEW YORKER No. 2

Another wonderful late kind. One of the best keepers. Smooth, shallow eyed and prettily shaped. Exceptional drought resister. A great yielder. Chosen by many as the best of main crop varieties. A sure producer of excellent quality potatoes. If you want some potatoes that will keep in fine shape until the new crop is ready plant some of our Rural New Yorkers. They will satisfy you.

### SPAULDING ROSE

Between early and late in maturity. Color slightly red. Shape long and very large. Flesh white and mealy. Wonderful yielder. A great potato for locality of a short season. Strong vines. If you want a variety that is not too late and yet not an early potato this will make a fine selection.

### SIR WALTER RALEIGH

Pure white in color. Round to oblong in shape. Finely grained. This is a newer variety than some, but well established as one of the leading main crop potatoes. It is steadily becoming more popular because its many high points of fine quality and big yields are proving it an exceptional money maker. Our seed wins friends everywhere it goes. It is in great demand and we urge you to try it.

Price in small lots, any variety.  
Postpaid, 1 lb., 20c; 5 lbs., 65c.

### POTATO TREATMENT SEMESAN BELL or Dip Dust

The modern method of checking disease on potatoes. No soaking necessary. Just mix, dip, drain and dry and your potatoes are ready to plant. Controls such costly diseases as scab, rhizoctonia and black leg. Increases yield 15 to 25%. One pound treats 16 to 20 bushels. Price, 1 lb., \$1.75; 5 lbs., \$8.00, express prepaid.

Twinbrook  
Farm,  
Emaus,  
Penna.

Dear Sirs:

I have been using your seeds for thirteen years which in itself means quite a lot. I have found your seeds satisfactory and always saved money by buying from your Company. My Sudan was wonderful and your Dakota No. 12 Alfalfa was the only field in the neighborhood that did not show bare spots after the first winter.

Yours,

P. G. Lichtenwalner.

# KENTUCKY BLUE GRASS

## New Seed at Low Prices

You can buy our finest Kentucky Blue Grass at exceedingly low prices this year. See page 24. You cannot afford to have pastures with thin stands, when seed can be had at these figures. Make new seedings heavy. Thicken up old stands with a top seeding. Make your acres give you more pasturage.

Our seed is all new crop, thoroughly re-cleaned, heavy weight seed. It is high germinating seed far superior to light chaffy seed, frequently sold. Quite a lot of Kentucky Blue Grass seed carried over last year which will be of lowered germination.

Our seed is all new crop. It's the kind that produces those beautiful productive pastures that are the pride of every farmer.

Small lots, Postpaid, 1 lb., 30c; 5 lbs., \$1.25; 10 lbs., \$2.25. Also page 24 for prices.

# RED TOP

## Grows Most Anywhere

No land is too poor to grow Red Top. It does well where many other grasses fail. If you have trouble getting a stand of grass sow Red Top—it seldom fails. It grows on dry land, and is specially adapted to wet land. Some like it mixed with Alsike Clover. It matures along with Timothy.

Red Top grows on soils low in lime. It is a great drought resister. Stops washing of the soil. Makes a good hay crop. One seeding lasts several years. Begins early in Spring, and continues its sturdy growth throughout Summer and Fall. Sow about 10 lbs. to 12 lbs. per acre.

This year our price on Red Top is very low. Our seed is very high quality. You get a real bargain in the kind of seed that will give you the best assurance of success. We guarantee to save you money.

Small lots, Postpaid 1 lb., 20c; 5 lbs., 90c; 10 lbs., \$1.75. See page 24 for quantity prices.

## ENGLISH BLUE GRASS OR MEADOW FESCUE

Now you can secure high grade new crop seed at ridiculously low prices.

This valuable grass obtainable at bargain prices. Very hardy. Grows in all sections. Height, 2 to 3 feet.

Highly nutritious. Good for hay and pasture, but used principally for pasture. Produces two tons of hay per acre on average good land. Stands last longer than Timothy.

Begins growth very early in Spring. Keeps growing after frost kills native grasses in Fall. One of the very best for wet land. Seed quite a bit larger than Kentucky Blue, and much cheaper this year. Sow 20 to 25 lbs. per acre for full seeding. Sow spring or fall on well prepared seed bed. We have beautiful seed for you. Postpaid prices same as Red Top.

## Domestic Rye Grass

A Very Popular Quick Growing One-Year Grass

Gives full hay crop same year sown. A good yielder. Will give more than one cutting if conditions are favorable. Can also be pastured. Sow early in spring like other grasses but without nurse crop. Grows rapidly. Sow 30 to 40 lbs. per acre. Seed is very cheap this year (see page 24). It's just the crop thousands of farmers need badly.

Small lots, Postpaid, 1 lb., 20c; 5 lbs., 75c; 10 lbs., \$1.35.

## English Rye Grass

Similar to Domestic Rye Grass, but a perennial.

Rapid grower. Very nutritious. Used for meadows, pastures and lawns. Bears close cropping. Makes a beautiful sod. Same price domestic.

Glenbeulah, Wisc.

Gentlemen:

I have been your customer for many years, and have always had satisfactory results. Your

grass seed is so dependable, being so free of noxious weeds. One field of Alfalfa from your seed lasted nine yrs. Yours truly, OTTO H. HERRLING

# BROMUS INERMUS

Also Known as Brome Grass

## Excellent Drought Resister and Heavy Yielder

Makes a splendid hay and pasture crop. Good feeding value. Livestock is very fond of Bromus. Produces heavily. Roots of Bromus go down 5 to 6 feet. It is a wonderful drought resister. Stays green when other grass becomes dormant. Starts a couple of weeks ahead of most grasses. Does well on clay loam and sandy soils. Usually makes some hay first year. Second and third years produce extra heavily. The most severe winters will not kill it. One seeding lasts many years, yet it is not difficult to eradicate.

Our prices this year on Bromus are at bargain levels. Now is a good time to start with this heavy yielding, cold and drought resisting grass. Sow 20 lbs. per acre, spring or fall. May be sown with or without nurse crop. Seed is larger than the average grass and should have a light covering. Our seed is high quality free from quack.

The great increase we have had in the demand for Bromus during the past few years shows its growing popularity. It is a distinctive grass that increases production and profits.

Small lots. Postpaid, 1 lb., 20c; 5 lbs., 90c; 10 lbs., \$1.75.

See page 24 for wholesale prices.

## ORCHARD GRASS

### Low Prices on New Crop Seed

A very productive perennial grass. Starts growing very early in the spring. Grown in every state in the Union. Makes good hay. Yields about same as Timothy. Best grass for shady places. Keeps creek banks from washing. It is a good drought resister. Makes a fine combination with Red Clover for hay. Gives heavy aftergrowth after hay crop.

We know that customers who start with Orchard Grass will seldom do without it. It is a grass of great value. It will pay you to get acquainted with it.

Our seed is all new crop and guaranteed to satisfy.

Sow 20 lbs. per acre. See page 24.

Small lots, Postpaid, 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75. See page 23 for lawn grass mixtures.

## Canada Blue Grass

This is also known as Virginia Blue Grass. Thrives on soils composed chiefly of clay, particularly stiff clay soils of low fertility. Also good on gravelly clay soils but not so good on sandy soils. Average growth 8 to 12 inches. Forms a close turf. Excellent pasture for beef and dairy cattle. Withstands more heat and drought than Kentucky Blue.

We have seed of beautiful quality. Our prices this year have been greatly reduced and are bargain quotations. Sow about 20 lbs. per acre.

## BERMUDA GRASS

A southern grass not suited for northern states. Very extensively used for lawns and pastures. It spreads to make a dense turf. Especially good on clay but also does well on sandy soils. Helps to keep soil from washing.

Seed very small. Sow 8 to 10 lbs. per acre. Postpaid Prices, 1 lb., 45c; 5 lbs., \$1.75; 10 lbs., \$3.50.

Apple Grove, W. Va.

Dear Sirs: I

have been using your seeds for the past five years. I find them perfect in every way. Good in purity, high in germination. They surely stand extreme cold weather. Your prices are much cheaper than I can find anywhere else. Yours respectfully, C. D. PUTNEY.

# RED CLOVER

**The Nation's  
Greatest Clover Bargain  
Guaranteed Best Value**

We guarantee this to be the best value for the money that you will be able to find anywhere, anytime this season. You may find lower prices but nowhere as much real high grade seed value at such a price. Order this seed now. After you get it we will allow you 60 days to make any comparison or test you wish. If you can match our value, or if for any reason whatsoever you are not thoroughly pleased with your purchase, you can return the seed and your money plus freight will be promptly refunded.

## See Sample Enclosed

It speaks for itself. Bright color, bold berries, high purity and strong germination. It has everything you want. No seed could do more for you. It is far superior to the average seed. It is better than what is quite generally sold as the best. You will find it more economical. It goes further. You take no chance on noxious weeds.

Lot Leader is hardy northern grown seed. It is adapted to the most severe climates. There is no southern or Pacific Coast seed in it. It is a safe sure seeding anywhere.

## Markets Have Advanced

Red Clover seed production is below that of last year. Early in the fall seed sold at low levels on account of depressed conditions. Since then the shortage of seed has become evident. Advances are bound to come. A large acreage of clover will be seeded. Old stands are way below normal. Higher prices must follow. Save on our early purchases.

Take advantage of our present values. They are unbeatable now and cannot be duplicated later. See page 3 for description of regular grades of clover and page 24 for prices.

**MAMMOTH RED CLOVER**

**Guaranteed to Save You Money**

This is beautiful seed. Fine color. Excellent purity and germination. Free of noxious weed seeds. It will satisfy the most critical buyer yet priced so low that it will delight the most exacting bargain hunter. This is guaranteed a "Matchless" value. It is genuine hardy northern home grown Mammoth. The seed is full of the strength and vitality that makes heavy healthy stands. It is even nicer than Lot Leader of which a sample is enclosed.

This is a bargain that spells real economy. Such seed goes much farther than the average. You are more sure of getting a stand from it. A "stand" is what you want. That's why you buy seed. You want it clean and hardy. That's what you get in Lot Matchless. We guarantee that you can't beat this value.

Mammoth Clover is a large variety of Red Clover. It is also known as Sapling, Big English, Bull and Pea Vine Clover. Superior for soil building. Extensively grown where seasons are too short for two cuttings and wherever an extra heavy crop is desired. Genuine Mammoth always sells at a premium. Our price is extremely low considering the highly desirable quality of our seed. Advancing markets are making this a bigger bargain every day. Order it while we have it at this price.

Auburn, Mich.

Gentlemen: I find you always live up to your advertisement, "Quality seeds at lowest prices." Your clover is putting my soil back to profitable land and at your low prices we can plant more of it.

Yours truly,

August Krieger.

CROP**

# SWEET CLOVER

## Varieties

The **Common** or **Big White** is the kind most generally grown. Lives two years. Grows 6 to 8 ft. high if not cut. For pasture and soil building this variety ranks highest. Has big powerful roots that go down deep. They decay quickly when crop is plowed under.

**Grundy County White** lives two years. Does not grow so large, generally not exceeding 3½ ft. It is about 3 weeks earlier than Common. Seed is smaller.

**Yellow Biennial** lives two years. Larger than Grundy but not as large as Common. Matures in between the two. Finer stemmed and more leafy.

**Hubam.** An annual or one year variety. Makes complete growth in one year. In big demand when it is desired to plow under the crop in the fall of the same year it is sown. Resembles common white when growing.

## You Need Sweet Clover

You are looking for better farm profits. Are you doing all you can to get them? You can't do much about prices but you **can** do a lot about production. Sweet Clover is the greatest soil building force that nature has placed at your command. Use it liberally this year. The seed is the lowest priced in the history of the crop. If there ever was a time when you needed Sweet Clover that time is now.

## The Greatest Soil Builder

It is easy to increase your corn crop 20 to 25 bushels per acre after Sweet Clover. That has been done thousands of times. You need those extra 25 bushels for profit. A crop of Sweet Clover plowed under is equal to 25 big loads of manure per acre. It stores nitrogen in the soil. It supplies enormous quantities of humus. The big powerful roots go down deep. They break up hard sub soils. When plowed under they decay quickly. The roots and tops soon become a part of the soil. Heavy soils drain better and are easier to work. Sandy soils have their water holding capacity increased. You can notice the effects of the crop for several years.

Sweet Clover is a wonder worker and a money maker. It can give you quick results. Sow this spring with small grain. Pasture it this fall. Plow it under next spring just before corn planting time. Thousands are using the crop in just that way. Its miraculous fertilizing value will amaze you.

## Very Valuable Pasture

Sweet Clover has a tremendous capacity as a pasture crop. Can be pastured the first fall. The second year you can hardly stock it heavily enough to keep it down. Will carry one to two head of cattle in the fall and three to four head per acre for second year. You can put hogs on in addition. If it grows too fast it can be clipped back. Less danger of bloat than with most clovers. If cattle have access to a straw stack there is practically no danger at all. Provides pasture during hot dry months. Sweet Clover is high in protein. Cuts down on grain. Reduces costs of animal production and all the while it's building up your land.

## Other Points of Value

Sweet Clover generally makes a hay crop first year if not pastured. Two hay crops can be secured second year. Cut as soon as buds appear. Leave a high stubble for second crop. Sweet Clover is also a good seed producer but its greatest value lies in pasture hay and fertilizing. Properly cured Sweet Clover hay is practically equal to Alfalfa in feeding value.

Sweet Clover is a great drought resister, remaining green under very unfavorable conditions. Sow fifteen pounds per acre on firm seed bed, cover lightly. May be seeded just like red clover.

Blackstone, Va.

Gentlemen: I have used your seeds for many years with satisfaction. The quality has never disappointed me. The price, excellency of the seed considered, has been much lower than I could secure elsewhere.

Very sincerely,  
BENJ. R. MORSE.

ALL RECLEANED SEED  
**\$1.20 at CLARINDA**  
PER BU. **\$1.35 at CHICAGO**  
30 LBS. to BU. PER BU.  
**BAGS FREE**

## White or Yellow

Thoroughly recleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

Our seed is all fancy new crop very carefully cleaned seed. It is a high grade product and our prices the lowest ever made since the crop was put to general farm use.

### An Astonishing Bargain

You will find further proof of our leadership in the Sweet Clover industry in this attractive bargain. Not quite so fine as Lot Beauty. Somewhat larger berries and a little better color than Lot Grow-More. It is the straight common or big White Sweet Clover. This is the grade that a good many dealers sell. It is nice clean stock. Our seed is scarified by the Eddy process, making it a superior product.

### Saves You Money

This lot, like every other in this book, is guaranteed to save you money. Return the seed and get your money back if you don't consider it an exceptional bargain. This seed is absolutely reliable. With good seed so cheap you will find it good business to sow a large acreage to Sweet Clover. Your land needs such a crop. Good farming demands clover. Start this money-making crop. Use it for pasture and hay. Cash in on its great soil building power.

Your cash outlay is small when you use such seed. You will be getting something thoroughly reliable and you'll make some money. This bargain will "Beat-'em-All."

### Extremely Low Price—Extra Good Values

This lot stretches your money over more acres than any other. You receive a dependable seeding too. That is why it is such an exceptional bargain.

This is the Big White or Common Sweet Clover. It has been scarified by the famous Eddy process, which is far superior to any other method. All our scarified Sweet Clover is handled over this machine. It gives higher and stronger germination. Very few seedsmen use this method. Some do not scarify at all.

### Very Carefully Prepared

Lot Grow-More is a product of the modern efficient Ferrell cleaning and grading machines. Carefully cleaned and scientifically graded, it is a reliable value. Its appearance isn't quite as nice as our best grades, but it will give entirely satisfactory results. The purity and germination tests are good. Some of the berries are a little smaller. The color is a little below our high standard. There are more seeds per pound. It performs right along with better grades.

### This Grade in Big Demand

We have many customers who demand this kind of seed and have sold it for many years. These farmers judge by results only. The price this year is so sensationally low that everyone can afford to sow it. No other clover seeding is as cheap. Never before have you been able to buy so much value for so little money. Such a bargain will go fast. Place your orders early.

We guarantee complete satisfaction. Return it if you are not thoroughly pleased with your purchase.

**\$200  
PER BU.**

**LOT BEAUTY**

### A Very High Grade Lot

This is a magnificent value. Beautiful plump berries. High bright color. High purity and strong germination. It is extra good seed. Scientifically cleaned and scarified by the most modern method. A product superior in quality to what is frequently sold as the best. Seed that will satisfy critical buyers.

No seed could give better assurance of success. It is as safe and sure a seeding as you can make. Such seed is always economical. At our astonishingly low prices it is a matchless bargain.

### Low Prices in Spite of Short Crops

We guarantee our prices as the lowest obtainable and that they will not go lower during the season. Sweet Clover seed production was much lower than the previous year. Many sections that normally ship out seed had to hunt their supplies elsewhere. The limited production moved seed rapidly. The shortage of seed will be better known as the season advances. Already seedmen who failed to buy early have been compelled to increase their prices. More advances will come later.

Our customers are getting the full saving of our early buying on the lowest markets. The prices at which we are selling this wonderful Lot Beauty is proof of that. Place your orders early. Buy freely. Another generation may come and go before prices are again so low. See page 24 for prices on regular grades.

**\$270  
PER BU.**

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,

MIKE ZOPP.

## The Finest Yellow Sweet Clover

A magnificent value. A wonderful bargain. The pure, leafy, finely stemmed yellow Biennial. Extra fine quality seed. The cream of the crop. You will find few, if any, lots to equal it, none better. It will satisfy you no matter how hard you are to please. It's the best that nature, plus improved cleaning and scarifying machinery, can produce.

## Price Extremely Low

Consider its extra fancy quality. Then judge the value by our price. It's the lowest price ever made on such seed. We guarantee it to be a lower price than you can get anywhere this season on such quality. Chances are you will not find a quality to match it. This is the seed for those who want the best that can be bought, at absolute rock bottom prices.

## A Fine Variety

Very popular for hay because more leafy and finer stemmed. Extensively used for pasture. A fine soil builder. Not so coarse as common white. Because of earlier maturity may be grown further north or wherever 10 days' earliness is desired.

**LOWEST  
PRICES  
IN HISTORY  
OF  
SWEET  
CLOVER**

**LOT  
PREMIUM**

## Makes Dollars 25% Larger

A high quality lot priced still lower. We bought it a little cheaper because it had some yellow sweet in it. Only about 10 percent.

The mixture doesn't hurt it for practical purposes. A good many farmers prefer to have it mixed. They say it gives better variety in feed because the taste is a little different. Being lower in price the seeding cost is reduced yet equally satisfactory results obtained.

## A Very Attractive Bargain

Lot Premium is a matchless value for the money. Good color. Very free of weed seeds. Scarified by the Eddy process. High germination. A thoroughly reliable and serviceable seeding. We stand back of it with our strong guarantee assuring you complete satisfaction and a handsome saving. Gives results equal to the finest lots of straight White or Yellow yet it costs you less, to sow.

We are in constant touch with markets and are quick to snap up bargains that will please our trade and give them an extra saving. This lot is one of those "snaps." You share the saving. It gives you more real reliable value for your money. Buy it while we have it. You will profit by doing so.

\$ **2.60**  
—

**BARGAINS**

**LOT PROFIT**

## Extra Low Price on Yellow Biennial

A bargain that pleases because it will give results that satisfy. New crop, recleaned, scarified seed. Very good purity and germination. A reliable and dependable seeding. Not so extra fancy in appearance as Lot Gold but a very serviceable lot. It's a miracle value at this price.

We recommend this lot to the farmer who wants to keep his seeding costs down to the last penny. Lot Profit will give you entirely satisfactory results. We guarantee that you'll be pleased with it. It's a far better value than you would expect for this price. If you don't find it so you can send it back and get your money back promptly.

\$ **2.40**  
—  
PER BU.

Lakefield,  
Minn.

Dear Friends:  
I like your seeds and recommend them to others. Your seeds do well in

this section. I save money by buying from you. I am well satisfied and am sure other farmers will, too.

Yours truly,

JOHN GREIN.

# ALSIKE CLOVER

## LOT ECONOMY

**\$4.80**  
PER BU.

### Fine Seeding at Low Costs

You can sow this remarkable crop at a cost of but slightly (more) than sixty cents per acre. A bushel sows 6 to 8 acres. It is one of the surest seedings you can make. We have slashed the price of this seed to new low levels. Lot Economy always has been one of our outstanding bargains. At this drastically low price it is a surpassing value.

Alsike is a perennial clover. One seeding lasts several years. Grows on all soils except very dry ones. Seed is very small and goes a long ways. Almost sure to make a stand. Best clover for wet or sour land. Fine in hay or pasture mixtures. Higher in feeding value than Red Clover.

### Description

Lot Economy makes a cheap seeding yet a very good one. We secured this seed at a most attractive price because it contains some Timothy. That makes a wonderfully productive seeding but can be purchased for less because it is mixed. Runs over half pure fine Alsike. When sown at 10 lbs. per acre gives 80 Alsike seeds per square foot. At 8 lbs. per acre, 60 Alsike.

Do not confuse this with the ordinary mixture of Alsike and Timothy. It is a far different article. Sells at 60 lbs. per bushel. You can cut your seed bill 20% to 30% by using Lot Economy. It's guaranteed to satisfy you. Your money back if you can duplicate it anywhere. It's nice, clean, high germinating seed.

## LIFE SAVER PASTURE COMBINATION

### Alsike and Sweet Clover

This is the richest heavy producing combination for pasture that we know of. It makes good hay, too. The cost of seeding is low. Sow 10 to 12 pounds per acre. Seed runs 60 pounds per bushel. It sure is a wonder for production. Sweet Clover alone is a heavy yielding pasture. By adding the Alsike you add an enormous amount of rich, luscious undergrowth. You can turn an almost unbelievable amount of stock on such a pasture.

### $\frac{1}{4}$ Economy Alsike — $\frac{3}{4}$ Sweet Clover

The Lot Economy Alsike described above is combined with Sweet Clover to make this wonderful value. There are about 3 times as many Alsike seeds per pound as there are of Sweet Clover. Therefore, this seeding will give you about a 50-50 stand. The Sweet Clover seed is scarified, high testing seed. It makes a most remarkable combination that is practically sure to make a stand.

The big demand for it shows the popularity of it and our new low price will save you 20% to 30%. Stretch your dollars by using Lot Life-Saver.

Dorset, Ohio.  
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,  
LAWRENCE S. GIDDINGS.

**\$3.30**  
PER BU.

## LOT ALSIKE MERIT

### Extra Value at Low Cost

Again our customers share in an exceptional purchase. This low price on this fine seed is possible only because we had ready cash to snap up two cars on a quick deal.

It is a fine lot of Alsike containing a small percent of White Dutch Clover, and Timothy. For all practical purposes it is just as good as pure Alsike. In fact, we prefer a little mixture to help hold up the Alsike. Runs over 90% pure Clovers. Lot Merit is one of the most nutritious seedings. It's well recleaned. No harmful weed seeds in it. Strong growing power.

One bushel sows 8 to 10 acres. It is a wonderful value and guaranteed to satisfy.

See page 3 for description of our regular grades of clovers and page 24 for prices.

**\$6.60**  
PER BU.

## LOT SURE-GROW COMBINATION

### Alsike and Red Clover

This fine lot of Alsike has a little Red Clover in it. Preferred by many farmers to straight Alsike. The stronger stemmed Red helps the Alsike grow erect. Produces a heavier yield. Makes excellent hay. Fine quality recleaned seed guaranteed to satisfy.

Our direct-to-farmer price makes this an unbeatable bargain. It is a wonderful value for the money. Very economical to sow. Only takes about six pounds per acre. Makes a great clover seeding at only seventy-five cents per acre. Values such as this are most convincing proof that it pays to buy-by-mail, Direct-from-Berry's. You share in our enormous buying power. You benefit by our improved cleaning machinery and you pay only one small profit.

Lot Sure-Grow is a bargain that is sure to please.

**\$6.90**  
PER BU.

# HUBAM

## LOWEST PRICES

### Drastic Reductions on the Wonder-Working Annual White Sweet Clover

Again we have smashed prices to new record low figure. It is now as cheap as the common white was last year. A few years ago it sold for over \$7.00 per pound. Now is the time to get started with this great crop. It has changed farming practice in many places.

Cash in on the added profits Hubam can make for you. Put this great soil-building force of nature at work on your farm. It costs but little and does much.

### Does Two Years Work in One

With Hubam you can work your land harder and still keep it in excellent fertility. It is no longer necessary to hold clover over a second year. Sow it with grain in the spring. Plow it under the same fall. You add enormous quantities of humus and nitrogen to the soil. Your land is ready for a cash crop again next year.

### Other Values of Hubam

You can get two cash crops a year with Hubam. Your small grain first, and then a seed crop of this clover. Produces up to 600 pounds of seed per acre. Sometimes more. You can pasture it after the grain is off. It carries a heavy load. Generally if pastured until fall it will reseed itself for next spring. If no reseeding is desired plow it under when it begins to bloom.

Hubam also makes a good hay if cut when it begins to bloom. The feeding value is excellent, practically equal to Alfalfa. In manner of growth it appears identical to common White Sweet, although not as coarse. It is also an excellent bee pasture.

### Lot Marvel Extra High Grade

This beautiful value is a great bargain. The quality is the finest you can find. High colored, plump, fully matured, berries. Thoroughly re-cleaned and scarified. Excellent purity and germination. This is strictly extra fancy seed. It will give you the best possible assurance of success. It is pure genuine Hubam. We are selling this fine quality at a price that we guarantee lower than any other obtainable on such fine stock. You will be highly pleased with the seed and you will be convinced that you have made a substantial saving. If you find the shipment otherwise you can return it, and money, plus freight, will be promptly refunded.

Hubam will make you money. Put the crop to work for you. Sow this spring. Cash in on it this fall.

LOT  
MARVEL

\$4.50  
PER  
BU.

## DALEA or WOODS CLOVER

### A Great Soil Builder The Clover that grows on sour soil

This is a remarkable crop. A one year or annual clover. A wonderful soil builder. Too bitter for pasture, but a great nitrogen gatherer. Flourishes on land too sour for other clovers. Grows without lime. Sow in the spring, but not too early. Some sow at same time of spring grain. Others after grain is up, harrowing it or letting rains cover the seed. May also be most successfully sown alone. May be sown as late as July 15th. Seed shaped like Red Clover, but larger and grayish brown in color. Use 15 pounds per acre. Inoculate your seed. Seed runs 60 pounds per bushel. Plow under the same fall. Does not live over winter.

Dalea may be saved for seed crop. Yields 5 to 8 bushels per acre. Good demand for it. Crop grows up to 36 to 42 inches high. Enriches the land with humus and nitrogen. Crop comparatively new. Seed still scarce. Our prices reduced in spite of short crop. Seed all scarified and thoroughly cleaned. A high quality product free of all noxious weeds. Better order Dalea seed early. Ours is a bargain price. Good as long as supply lasts.

North Liberty, Indiana.

Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,  
ELDEN KANE.

\$3.90 PER  
BU.

# KOREAN CLOVER

**\$2.00 PER BU.**

## A great Crop for poor, sour soils. Wonderful Soil Builder —

### EXCELLENT FOR PASTURE AND HAY

In all our 38 years of experience as seedsmen we have never seen a crop leap into prominence like Korean Clover. Almost overnight it has become a crop of major importance from southern Iowa south. While it is a crop especially adapted to the southern two-thirds of the United States it is working its way northward into Iowa, Illinois, Indiana, Ohio and Pennsylvania. In the north it is advisable to use it in an experimental way to start with. In the southern two-thirds of the nation it is giving wonderful performance.

### CHARACTERISTICS OF KOREAN

It is a clover and therefore a legume or soil building crop. Its particular value over other Clovers is its ability to grow on very poor sour soils without any lime being applied. Whenever other clovers like Red or Sweet Clover or Alfalfa can be grown we consider them superior because they make a taller growth. If your land is not so well adapted to these other Clovers then by all means grow Korean Clover or Lespedeza. It grows on the very poorest land and builds up its fertility.

Korean Lespedeza is an annual or one-year Clover. It reseeds itself very readily excepting in sections where the season is too short to permit the seed to mature. Even if pastured very closely it still reseeds itself nicely, the second year stand often being heavier than the first. It is not, however, difficult to eradicate because being an annual it can be quickly destroyed by cultivation.

### WHAT THIS CROP CAN DO

Makes excellent hay if there is a good heavy stand. One of our seed growers said he got three tons of hay per acre in the one cutting the crop gives. It was so thick on the ground it did not even fall down after the mower went through it. While not so tall as some Clovers it is very leafy and that is the most valuable part of any hay. When stands are thin the plants do not grow erect and it is then difficult to get a hay crop.

Korean Lespedeza makes an excellent summer pasture, giving its heaviest production during July and August. Many farmers use this crop to thicken up old pastures. Others use straight Korean pasture.

### CIRCULAR GIVES FULL INFORMATION

Be sure to ask for our Korean Circular. Gives statistics on pasturage and feeding value. Tells how and when to sow. Tells how to harvest seed and much additional information on the great value of this wonderful crop.

### OUR PRICE AT BARGAIN LEVELS

We have slashed our prices on Korean to less than half of last year's figures. It is all high quality, new crop, thoroughly cleaned seed. Guaranteed to stand up to any test and to satisfy you in every respect. You are getting the utmost limit of value in such seed at our low prices. If you need very large quantities tell us how much and will give you special quotations. Figure on sowing 12 to 15 pounds per acre. Seed weighs 25 pounds per bu. Price includes bags free. You can sow the crop anytime during the winter or early spring. Get your orders for our Korean Lespedeza in early. We will ship you extra fine stock and you will be making a saving worth while.

Small lots postpaid, 1 lb., 30c; 5 lbs., \$1.00

### LESPEDEZA SERICEA

We can supply this perennial variety. Supply very scarce. Prices around \$5.00 per pound. Write for latest and lowest prices.

# LAWN GRASSES

Our lawn grasses are made up of clean, high germinating seed. Considering quality our prices are very low. You'll save money by using such seed.

**Extra Choice Lawn Mixture.** For general corn belt conditions. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grass. Coarser grasses disappear after slower growers get started. This is our most popular mixture. We sell lots of it. Is reasonably priced and gives satisfactory results.

Postpaid prices: 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.40; 10 lbs., \$2.70.

Kentucky Blue Grass. See page 16.

**Shady Spot Lawn Mixture.** Contains grasses naturally adapted to growing in shade. Fine for grounds shaded by trees or buildings. Same price as Choice Lawn Mixture.

**Special Terrace Mixture.** Contains deep rooted grasses that hold soil firmly. Best for sloping places and terraces.

Postpaid prices: 1 lb., 45c; 3 lbs., \$1.25; 5 lbs., \$1.75.

**Southland Lawn Mixture.** Contains grasses adapted to the south, including Bermuda Grass and Southern Blue Grass. Makes a beautiful lawn. Price same as Special Terrace Mixture.

## WHITE DUTCH CLOVER

The small white clover so popular in lawns and pastures. Fine for top seeding on old pastures. Increases production. Improves feed value. Seed very small. Four lbs. per acre makes a good seeding. Drought cut seed supplies very low. Our price on high quality seed very low in spite of seed shortage. We have a dandy value for you in this seed. See page 24 for prices.

Price on small lots, Postpaid, 1 lb., 55c; 3 lbs., \$1.50; 5 lbs., \$2.25; 10 lbs., \$4.25.

## CRIMSON CLOVER

### Or Giant Incarnate

A winter annual. Sown in the fall in southern states where it lives over winter. Sown only in the spring in northern states. Good producer but does not make nearly as large a growth as other annual clovers such as Hubam. Makes good pasture in the north and hay crop if weather is not too hot. Good soil builder. Seed much larger than red clover. Sow 15 pounds per acre. See page 24 for prices.

Our seed is of the reddish type which is distinctly superior to the straight yellow type. All high quality and priced to save you some money.

Small lots postpaid, 1 lb., 30c; 5 lbs., \$1.25.

Watson, Missouri.

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL.

# INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

## Inoculation Necessary

No legume can flourish without proper inoculation. Often the lack of inoculation means a failure. This applies to all clovers, alfalfa, peas, beans and vetches. The same inoculation does not answer for all. There are several distinct species. Therefore land may be inoculated for one legume and be utterly lacking for another variety.

You may have inoculating bacteria in your soil. If a certain legume has been growing successfully on your land in the past few years, then it is reasonable to assume that you do not have to inoculate the seed of that crop when you reseed. If such a crop has not been grown recently on your land, there is no way of telling if it is inoculated.

Don't take chances. The extra cost of inoculation is a minor item. If you neglect to inoculate you may lose your seedling because of it. Inoculation puts live bacteria on your seed. They go into the roots after the seed sprouts. Then and then only can your legume plant take nitrogen from the air for its own growth and for soil building. Without inoculation the plant uses up the nitrogen in the soil and then generally turns yellow and dies.

We sell inoculants that are guaranteed satisfactory. Your money back if they fail to do their work properly. See column on opposite page.

# ALFALFA

We guarantee our Alfalfa values to be the finest bargains obtainable anywhere.

## LOT MORE HARDY

### Half Grimm

U. S. Verified Origin Seed

#### The Lowest Priced Super-Hardy Alfalfa

**\$7.50**  
PER BU.

During the past years we have been able to secure for our customers some Grimm Alfalfa at a very low price. It contains some Northern common hardy and on account of not being straight Grimm can be secured at a big discount. This seed has given wonderful satisfaction. It is one of the most popular values we ever sold. You can cut your Alfalfa seed costs extremely low by using this seed. It produces stands that give lasting results. Big yields and fine quality.

#### Most for Your Money

Lot More Hardy is seed that has good purity and germination. It is free of noxious weeds. It is over half Grimm; balance hardy northern. The berries are a little smaller than the best grade. It contains some off colored seeds, but it is good reliable and serviceable seed. Customers report getting better results from it than from seed, purchased elsewhere, costing twice as much.

Truly, it is an amazing value. A real bargain. Any farmer wanting to save every possible dollar will take advantage of this sensational offer. There is a lot of extra satisfying value in this lot.

### U. S. Verified Origin

All of our Alfalfa seed is U. S. Verified Origin or State Sealed stock. That means that you can absolutely depend upon the seed being grown where the tag says it was. The U. S. Government checks up on this to protect you. We are "authorized" dealers in such seed and all our seed and records are checked directly by government men. Insist on U. S. Verified Origin Alfalfa seed.

### Alfalfa Seed Crop Very Short

The smallest Alfalfa seed crop in many years was harvested this past fall. There was practically no carry over from last year. The shortage is truly alarming. The seed has moved from farms. The present supply must take care of all orders for spring and fall. There is some extra Oklahoma, Texas and Arizona seed. Some seedsmen who are not authorized dealers in U. S. Verified origin seed may try to sell that in the north. No northern farmer should use such seed. Demand Western and Northern grown.

There are many dealers who still have to buy their Alfalfa seed. They will be compelled to pay higher and higher prices. The wise farmer will buy his Alfalfa seed early this year from dealers who bought early. We bought our supplies early in the fall and sell direct to you at the lowest prices. Nowhere else will you find so much value for such low prices as the book brings to you.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,

WM. E. KLEMKE.

LOT

## HONEST JOHN

**\$5.90**  
PER BU.

An

### Extraordinary Bargain

Good recleaned serviceable hardy seed priced extremely low. Absolutely the lowest figure at which you can buy dependable seed of this character. U. S. Verified Origin seed. Good purity and germination. No noxious weed seeds. A little off colored. Grows good. Produces beautiful stands of vigorous growing Alfalfa. If you do not object to a little lack of uniformity in looks so long as the seed is clean and will grow and produce a hardy stand, then this is your best buy. We sell thousands of bushels of this quality.

When these customers want more seed they call for Honest John. It gives them satisfactory results and saves them a lot of money. It's guaranteed to satisfy and will start you with the great money crop at small cost.

LOT

## DRY LAND

Nebraska—  
Kansas Seed

Highest Quality,  
U. S. Verified Origin

**\$8.90**  
PER BU.

The demand for this seed has shown a surprising increase in the past few years. Even northern customers in Wisconsin, Michigan, and New York are calling for it. While grown further south it comes from sections often having extremely severe and damaging winters. This stock survives in good shape and this hardy dryland seed is an excellent product.

Lot Dry Land is the very highest quality seed. The most particular buyers will be pleased with it. Extra high purity and strongest germination. Free from all noxious weeds. Big bold berries. Fine bright golden yellow color. You will be delighted with the quality. Our extremely low blue ribbon sale price gives you the finest quality at the lowest possible cost. Guaranteed to satisfy and save you money.

# EXTRA HARDY ALFALFA

## LOT DAKOTA

\$ **9.90** PER BU.

### DAKOTA NO. 12 Fine Extra Hardy Alfalfa

A high quality value at a low bargain price. The superior value of Dakota No. 12 Alfalfa is well known. Agricultural authorities recommend it. Growers are enthusiastic about its yield, quality and extra hardiness. This lot is the genuine article. U. S. Verified origin. Dakota-Nebraska grown and a dandy value.

Our perfected buying organization was successful in securing a large share of the seed crop early. That is the only reason why we can bring you such remarkable bargains this year.

The quality of Lot Dakota will please you. It is just a shade under the World Brand Dakota No. 12, which is quoted on page 24. High purity and germination. Absolutely dependable in every respect. No seed could do more for you. We guarantee this price the lowest for which such seed can be bought. A saving of at least \$2.00 per bushel is assured to you. This lot permits you to get a start of this famous variety at a very low cost. Satisfaction fully guaranteed.

**FINEST  
QUALITY**

## Lot BRIGHT

### Finest Nebraska Grown U. S. Verified Origin Seed

Straight Nebraska grown seed is hardy and is always in big demand but not always obtainable in large quantities. This year we perfected our buying organization in this state and have this beautiful high grade lot to sell. And, we are selling it at a bargain price.

You'll be delighted with the high quality in this hardy type. It is strictly World Brand grade. Ranks A1 in purity, germination color and size of berries. There is nothing better in Nebraska seed. Guaranteed to satisfy the most exacting and to save you money. Return it and get your money if you are not perfectly pleased.

Anyone wishing genuine Nebraska alfalfa can do no better than buy this Lot Bright. You'll get your money's worth, and then some. We endorse this bargain and recommend it.

\$ **9.00** PER BU.

Ashville, N. Y.  
Dear Sirs: I have always found your seeds to be very satisfactory and have gotten good results from them. I recommend your seeds highly at every opportunity.

Sincerely,  
CARL A. C. JOHNSON.

## Lot BED-ROCK GRIMM ALFALFA

\$ **8.40** PER BU.

### Grimm Alfalfa Sensationally Low Price

Some dealers may tell you it can't be done, but here it is. Straight Grimm Alfalfa seed, U. S. Verified origin seed. Extra hardy stock. Free of noxious weed seeds. Has the ability and power to produce good strong stands. Many customers report better results from this grade than from more expensive lots. A little darker color and a little smaller berries than the fancy looking lots. Not quite so nice in appearance but it delivers the goods. Many farmers nowadays look for performance rather than looks. Lot Bed Rock does perform in a most satisfactory way.

### A Real Bargain

These lots of seed that are somewhat off colored are naturally bought from growers at a discount. Instead of mixing them with higher priced seed we clean them separately. Thus we can take care of customers wanting genuine Grimm at the lowest possible price. It gives dependable service at a rock-bottom figure.

A test by weight showed more quick sprouts in a pound of Lot Bed Rock than in an equal weight of one of the most expensive lots. The secret lies in the smaller berries. More seeds per pound means more seeds per square foot. Any farmer wishing to hold down seeding costs yet get good serviceable seed will be pleased with Lot Bed Rock Grimm.

## LOT MONTANA

### Very Fancy Quality U. S. Verified Origin

We rank this lot along with the Dakota No. 12 for hardiness. Seed comes from well established fields. Lot Montana has very fine quality, fully equal to the average best. Strong germination, high purity, no noxious weeds.

This is U. S. Verified origin Montana-Colorado grown. It is a much finer grade than the price indicates. It is only because of our early purchases direct from producing sections that such a value is possible. Seed such as this gives lasting satisfaction. There are four to five acres of extra hardy Alfalfa in every bushel.

Compare this with any equal quality. You will find our price from \$1.00 to \$2.00 per bushel lower. A big saving and complete satisfaction are fully guaranteed.

\$ **9.60** PER BU.

# GRIMM ALFALFA

## At STRIKINGLY LOW MONEY SAVING PRICES

LOT  
**GOLD SEAL** \$ **12<sup>00</sup>** PER BU.

### Idaho State Sealed and Certified Blackfoot Section Grimm 98½% Pure 88-92% Germination

Fine, super hardy, state sealed and certified Grimm. Produced on the best fields, inspected both by state authorities and the Blackfoot Association. The fame of this Grimm has spread nationwide. Everyone who knows Alfalfa values will be quick to appreciate this money-saving opportunity. It is thoroughly reliable and dependable seed in every way. There is no seed that could do more for you or that would give you better satisfaction than Lot Gold Seal.

Good color, purity and germination. Free of noxious weeds. It is a wonderful value. You can find Grimm selling at higher prices but none of it will give you better results than this matchless bargain. The color is not quite so bright as the extra fancy grade. The seeds are smaller. There are more seeds per pound; therefore it goes further. There is a big extra measure of value in Lot Gold Seal.

### Demand for Grimm Increasing

More and more farmers want Grimm. No one questions its super-winter hardiness. When winters damage common Alfalfa it means thin stands the next year and probably a new seeding. That means expense and loss of the use of the land. It is then that you realize the economy of Grimm. The increase in yield is then large enough to pay the full cost of sowing the crop. Grimm gives you practical assurance against severe winter killing.

**STATE SEALED AND CERTIFIED GRIMM**

### Blue Tag Grimm

**Finest State Sealed and Certified stock.**

There is no finer alfalfa seed in the world than State Sealed and certified Blue Tag Grimm. Only seed of the finest color, highest purity and strongest germination will make this grade. It is the choice of extremely critical buyers. It is the best that money can buy.

### Lowest Prices

See page 24 for prices on State Sealed Blue Tag Grimm. Compare with any Blue Tag prices elsewhere. Learn how it pays to buy—by mail direct from us. We save you money on all grades and kinds of alfalfa.

### Buy Early

We were fortunate in securing fine stocks of State Sealed Blue Tag on early low markets. These bargains cannot be replaced today at these figures. Our low prices will move this seed fast. Order as early as possible.

# LOT "Bonafide" GRIMM

A wonderful value at a real money saving price.

### U. S. VERIFIED Origin

Our buyers frequently pick up different lots of Grimm at very low prices. The owners of these lots did not have them certified due to a desire to save expense or some technicality that involved too much red tape. We have complete record on these lots including papers from growers. It is also checked for origin by the U. S. Department of Agriculture.

You can buy this reliable and dependable Grimm seed at a big saving in price. You get an extraordinary big measure of value in this lot.

### Shipped in Sealed Bags

This is genuine northern Grimm. It is the kind that stands severe punishment. Produces heavy yields of fine quality hay. Shipped in sealed bags for your protection. Satisfaction with shipment guaranteed, or your money back.

\$ **10<sup>80</sup>** PER BU.

### Lot Bonafide a fine seeding

It has good color, nice sized berries, high purity and germination. Contains no noxious weed seeds. It will produce identically as heavy stands as can be secured from more expensive seed. This lot is not quite as high colored as the Lot Blue Tag of which a sample is enclosed. It is just as satisfactory in a practical way. Berries a little smaller than Lot Blue Tag. You will be thoroughly pleased with it.

### Good Seed at Low Cost

Any customer who wants to start with Grimm this year will make no mistake in selecting Lot Bonafide. We have set our price on this bargain even lower than last year. This was done in face of one of the shortest alfalfa seed crops this country has seen in many years. This lot gives you a fine alfalfa seeding at a very moderate cost. We have sold this kind of seed for many years. It gives excellent satisfaction.

Myerstown,  
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,  
MILES L. RISSE

# TIMOTHY LOT PURITY

## Low Bargain Price Extra Nice. New Crop Seed

No one can afford to neglect sowing grass seed when a good high grade seeding can be made for around thirty cents per acre. That's all it will cost you when you use this new crop, triple cleaned, high testing timothy, Lot Purity. It is the cheapest good seeding of grass seed that you can make. You will find it a thoroughly dependable seeding too.

It is easy to get a stand when you use such seed. It has good strong germination. Timothy can be sown early. Stands a lot of early freezing. Likewise it will stand dry weather better than most seedings. It is seldom indeed that Timothy seed of this character fails to make a stand. Grows on most any type of soil. One seeding lasts several years. Perfectly winter hardy.

Now is a good time to sow more acres of grass seed. Give your land a rest. Get ready for larger crops later when markets are better. Keep your soil from washing. Sow grass seed while prices are so low.

## One of Our Greatest Blue Ribbon Bargains

Our favorable location in the World's Largest Timothy seed producing section gives us a decided advantage in locating real bargains. Lot Purity is an example of the exceptional values our customers receive. All new crop, clean, live, solid seed. 99 1/4% Pure, 95% Germination. Triple cleaned over our new modern cleaning devices. Contains just a little more hulled seed than our World Brand grade (see page 24 for prices on all grades.)

This seed is a much finer quality than many dealers sell. It is the quality that makes it such a great bargain. We know it is a better value than can be secured elsewhere and expect to sell at least 25 carloads of this Lot Purity. Every customer who buys any of it is guaranteed a saving on every pound he buys.

## 30c Per Acre Cost

That's all it costs to make this fine seeding. A quarter of a bushel easily sows an acre. At that price you can afford to sow liberally. We have taken one of our high grade lots of all new seed and priced it down to a figure that halts competition. It makes your seed dollar bigger. Again we demonstrate that it pays to trade direct with the World's Largest Seed House, selling farm seeds direct to farmers.

This seed like all others is sold subject to our liberal guarantee. If after you get it you are not completely satisfied; if you do not feel you have made a big saving; send it back and get your money. Keep it 60 days if you wish to test it. We want you to be absolutely satisfied in every respect.

Stoddard, Wisconsin.

Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You saved me money and I got better results.  
Yours truly, ALBERT J. JONAS.

140

## PHALARIS OR REEDS CANARY GRASS

### A Most Remarkable Grass at New Low Prices

The most valuable grass that has been brought to farmers in many years. It is not a new grass, but it is only in the past few years that its adaptation to various conditions and its great value have become well known.

### Characteristics

It is a long lived perennial. Stands of it have been known to be established for 45 years. It makes a very dense sod, yet can be easily eradicated. Phalaris is very winter hardy. It can be grown anywhere in the Northern half of the United States. The growth is very leafy. It will grow on land that is flooded with water for long periods of time. On the other hand, on average farm land it will outyield Timothy, Bromus, Orchard or Tall Meadow Oat Grass. Even under drought conditions in Iowa it yielded over 3 tons of hay per acre. It is higher in feed value than most grasses.

Seed prices are much lower than last year. Write for free circular on Phalaris and learn all about this wonderful grass. Good money in seed crop.

Postpaid Prices: 1 lb., 80c; 5 lbs., \$3.75;  
10 lbs., \$7.00.  
Not Prepaid: 10 lbs., \$6.50; 25 lbs., \$15.00; 50 lbs., \$29.00; 100 lbs., \$57.50.

# MARVELOUS MIXTURE

## Lowest Price Ever Made on This Great Seeding Our Richest and Heaviest Producing Combination

You can search nationwide for bargains in desirable seedings without finding any to equal this. Our Marvelous Mixture has made thousands of enthusiastic friends. Its tremendous yields and the rich feeding value of the hay receives a hearty welcome on every farm. Year after year our sales on Marvelous grow larger.

It is always a good seeding. Always economical and now it is cheaper than ever. Cheaper in price and even better in quality. Smooth, clean, uniform, high testing seed. A combination designed to give you maximum production at the lowest seeding cost. Desirable, serviceable, practical. This great seeding is a wonderful bargain at this exceedingly low price. You will save money and get satisfaction.

### Rich in Clovers

Fifty percent clovers. That gives the hay a high protein analysis. That makes it a soil builder. Clovers blended with Timothy to produce the heaviest yields. Red Clover, Alsike Clover, Alfalfa and Sweet Clover. All recleaned, tested and guaranteed satisfactory.

Your land needs clover. Good farming demands it. By using this mixture you get your clovers at low cost. We buy a good many lots of seeds grown mixed at prices sharply lower than separated seeds. Clovers mixed with Timothy. Alfalfa mixed with Sweet Clover. All good seed but bought at a discount. By mixing these lots we can sell this wonderful mixture at exceedingly low prices.

### Marvelous Is a Money Maker

Surpasses all other combinations in yield. Our customers report 3 and 4 tons of cured hay per acre. It is justly called "Marvelous."

Marvelous makes fine pasture, supporting 3 head of cattle per acre with some hogs added. Keeps stock fat and sleek. It helps cut production costs on livestock.

One seeding lasts for several years. It inoculates your land for a seeding of straight Alfalfa. Marvelous Mixture stores nitrogen in your soil and adds large quantities of humus. There are reasons, plenty of them, why this seeding is so popular.

### Acre Cost Low

Twelve pounds of this mixture makes a good acre seeding. The acre cost is right around \$1.00. This is the best seeding you can make at that low figure. Sow it in the spring just as you would any grass or clover seeding. You are more certain of a stand from a mixed seeding like this. If conditions should be unfavorable for one of the crops you have the others to carry on.

We guarantee this seed to show up to your entire satisfaction and to be a matchless value for the money.

## PERMANENT PASTURE and MEADOW MIXTURES

### Fine Seedings at Low Cost

These mixtures are specially prepared to produce maximum yields and highest quality feed. The different blends are for various types of soil. These are permanent seedings. The pasture mixtures give a succession of growth throughout the season. These seedings have won the hearty approval of our customers.

The new low price we have on this seed is the lowest ever made. You can secure our carefully blended seed for less money than you can make your own mixture. Our private formulas are used. We use the following crops in varying proportions, Red and Mammoth Clover, Alsike, Alfalfa, White Dutch Clover, Blue Grasses, Red Top, Orchard Grass, Timothy, Rye Grass, Bromus, etc. All choice recleaned seed. Samples on request.

### Sow 15 to 20 Lbs. Per Acre Order By Number

| No. 4. Topseeding on marshes and swamps. | No. 8. Orchards and shady places.  |

### Quality Stocks

All seed used in these mixtures is recleaned high testing stock. Such seed gives satisfaction and is the most economical in the end. We recommend sowing 20 pounds per acre.

**\$5.50**  
PER  
50 LB.  
BU.

Clinton, Iowa.

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000.00. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,  
**RAYMOND C. LANGAN.**

# 3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. Now, this year, we have made them as much as 50% richer in Clovers. They are finer and better mixtures than ever and yet sell for less money. They are bargains in grass seed that will give fine results at a minimum cost.

## 4 WAY CLOVER & TIMOTHY MIXTURE

**Alfalfa, Red Clover, Alsike and Timothy**

**\$3.60 PER BU.**

**We recommend this highly Contains 30% to 35% Clovers**

Many enthusiastic customers have praised this mixture in the highest terms. This year it is finer than ever for we have increased the Clover content fifty per cent and have lowered the price twenty-five per cent. It is one of our finest producers and a very profitable seeding to make.

This gives you a fine opportunity to get some Alfalfa started on your land. Gives very satisfactory results. Our price on this re-cleaned high testing seed is drastically low. We prepare this combination by selecting some of our best lots of Clover, Alsike and Timothy and adding hardy Alfalfa to make a mixture 30% to 35% legumes. Requires only 12 lbs. per acre. All mixtures on this page weigh 45 lbs. per bushel.

## ALSIKE AND TIMOTHY

### SUPER GRADE

**Finer, Better, Richer, Cheaper**

**A Safe, Sure, Economical and Highly Satisfactory Seeding**

Here is a mixture that fills the needs of the times. A seeding that gives you plenty of Clover yet at a small cost. For seventy-five cents an acre you can get a stand of Clover seed and grass that is a wonder for production. Excellent quality hay. Less dusty than Red Clover and higher in feeding value. Produces far heavier than either Alsike or Timothy sown alone. This has always been a most popular seeding. Now with its increased Clover content and yet lower price it will be the choice of thousands of farmers.

**SUPER GRADE**

**\$2.90 PER BU.**

### Contains 30-35% Alsike

Consider what that means. Alsike seeds are small, less than half as large as Red Clover. This mixture will give you as many Clover seeds per acre as a 60% to 70% mixture of Red. When sown at 12 pounds per acre you get over 65 Alsike seeds on every square foot.

No seeding is easier to start. It lasts several years. Can be used for pasture or hay. Not particular as to soil conditions. The Timothy supports the Alsike, which accounts for the heavy yields. You will have just cause to be proud of a stand such as this Super Grade can produce. And then, the low cost is easy on a thin pocket-book.

### Save 1/3 to 1/4 on your Seed Bill

We guarantee to save you at least one-fourth on this high grade, re-cleaned seed. Compare quality and richness and your own eyes will tell you quickly. We buy large quantities of Alsike and Timothy grown mixed at sharp discounts. This seed we re-clean thoroughly and blend it carefully. The product is a dandy high testing lot of seed.

This Super Grade is an outstanding value for the money. You will like its quality. You will appreciate the big saving in seeding cost. You will be delighted with the rich heavy production it will give. It is a safe sure seeding at a real bargain price.

## ALSIKE and TIMOTHY REGULAR GRADE

**\$2.50 per bu.**

**A remarkable Value at Low Cost**

A very popular money-saving seeding. Contains 20% to 25% Alsike Clover. That figures 40 Alsike seeds on every square foot when sown at 12 pounds per acre. Produces fine, heavy stands of excellent hay. Often used for pasture. Easy to start. Not particular as to soils.

Cost of seeding is low, only around sixty cents an acre. Dandy, nice new crop seed. Thoroughly re-cleaned and carefully tested.

Guaranteed to satisfy. Gives you the utmost in value.

Stretches your dollars to cover a large acreage with a wonderful grass and clover crop. We recommend this highly to any farmer wishing something cheaper than our Super Grade.

Dalton, Ohio  
Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,

S. J. KULA

## RED CLOVER ALSIKE and TIMOTHY

**SUPER  
GRADE**  
**\$3.30**  
**PER  
BU.**

### Super Grade

Contains 30% to  
35% Clovers

A New and Richer  
Combination

This is a dandy. If you are in doubt as to what mixture you want to get, you will make no mistake in selecting this one. During the past few years the demand for Red Clover, Alsike and Timothy mixed has increased faster than any other. Our "Regular" mixture described below has been responsible for this big demand.

Now we have this better, richer, mixture, Super Grade, that is even a greater value. At a small additional cost, you get more than double the amount of clovers. Sown at 12 pounds per acre, you get over 50 clover seeds on every square foot. Think of getting such a seeding at a cost of around ninety cents an acre.

### All Quality Seed

High germinating, recleaned, good purity. A seeding that is lacking in quality is never cheap. A mixture like our Super Grade is a matchless bargain. We'll gladly send you samples to prove its worth.

You are almost sure to get a stand from this seed. If there are spots in your field not suited to Red Clover, the Alsike will come as it seldom fails to catch. The Timothy holds up the clover, permitting it to grow taller. The tonnage is increased. The quality is improved. We recommend Super Grade as a high class value that will satisfy you.

## RED CLOVER and TIMOTHY REGULAR GRADE

**Regular Grade—20-25% Clovers**  
**\$3.00 per Bushel**

Made up of the same high quality seed that goes into our Super Grade described above. A beautiful smoothly blended lot. You will recognize it as a fine value the minute you see it. Fifty per cent richer in Clover than our mixture of last year. Twenty per cent lower in price.

Never before such a bargain. It may be another twenty-five years before prices are again so low. This is the year to sow grass and clover seeds. We have slashed our prices drastically. Every Berry customer has the opportunity to buy quality tested seeds direct at wholesale. Bargains such as this make it to your interest to Buy by mail from Berrys.

You can't go wrong on these old favorite seedings. They make your dollars go farther. They produce heavily. They satisfy customers.

## RED CLOVER and TIMOTHY MIXED

**Super Grade—30-35% Clovers**

This new Super Grade is about three times as rich in Clovers as our Clover and Timothy mixture of past years. Gives a heavy Clover stand. At 12 pounds per acre you get 30 Clover seeds per square foot. This is an old favorite made better and richer and the price has been reduced. It is a value unparalleled in history. Good, live, cleaned seed. Thoroughly dependable for heavy healthy stands.

No farmer should neglect Clover seeding with such bargains at hand. You will make far more money sowing more grass and less grain. Smaller grain crops bring higher prices. Clover keeps your land fit. Use our high grade Clover mixtures at bargain prices.

All the Mixtures on this page are sold at 45 lbs. per bu. Prices include bags free.

**\$3.50**  
**PER  
BU.**

## RED CLOVER-ALSIKE and TIMOTHY MIXED REGULAR

### A Seeding That Satisfies

**Contains 20% to 25% Clovers**

Fifty per cent richer than our "Regular" grade of last year. Twenty per cent lower in price. That makes a bargain in keeping with the times. Our sales on the old mixtures have been phenomenal. Our new richer Regular Grade surpasses all previous values. Gives a good Clover content at an extremely low cost.

This triple mixture is a heavy producer and the quality of hay is fine. Makes an excellent pasture. You will find no equal quality elsewhere at so low a price. We guarantee to save you money on it. Your money back if you are not satisfied.

The seed is thoroughly recleaned and tested. Our heavy purchases for cash brought in this seed at unusually low figures. Our direct sales to farmers require only one small profit. That is why we can give you bargains that others cannot duplicate. That is why it pays you to buy Direct-by-mail from Berrys.

**\$2.70**  
**PER  
BU.**

North Manchester, Ind.

Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises. Yours truly,

A. F. STELLAR.

# BERRY'S SENSATIONAL BLUE RIBBON BARGAINS on GARDEN SEEDS

## FLOWERS

## OF RARE BEAUTY

The varieties listed below are selected for their beauty and their adaptability to the needs of our customers. The Tea Roses do best with some protection over winter; all other varieties are very hardy. The stock is strong and healthy and of the size that usually starts the easiest and gives the most satisfactory results.

Postpaid: 3 for 89c; 6, \$1.69; 10, \$2.49.

### Hardy Hybrid Perpetual Roses

#### Red

- 2100 Anna De Diesbach. Rose red. Especially fine in the buds.  
2101 American Beauty. The queen of crimson flowers.  
2102 General Jacqueminot. The flaming Rose of Romance.

#### Pink

- 2104 Paul Neyron. Bright rosy pink. The largest rose known, often as large as a saucer.  
2107 Mrs. John Laing. Large pink flowers. Extremely fragrant, borne on long stems.

#### White

- 2103 Frau Karl Druschki. Acknowledged by all to be the most perfect white.

#### Yellow

- 2106 Soliel D'Or. Golden yellow shaded nasturtium red.

### Hybrid Tea Roses

#### Red

- 2113 Gruss an Teplitz. Red rose in a class by itself, because it bears three times as many blooms as any other. Ironclad for hardiness.  
2119 Red Radiance. Pure red; foliage growth and habit same as in the parent radiance.

#### Pink

- 2117 Ophelia. A delicate salmon pink toned with rose. A flower that excites admiration. Flowers open full and double. Blooms profusely all summer.  
2121 Los Angeles. The long pointed buds open into beautifully formed flowers rich in fragrance. Flame pink, toned with coral and shaded with gold.  
2124 La France. Bright satiny pink.

#### White

- 2114 Kaiserin Auguste Viktoria. Pure white and a time-tried favorite.

#### Yellow

- 2112 Golden Emblem. Best yellow bloomer; blooms constantly.  
2118 Sunburst. Brilliant, orange-copper; long stemmed, vigorous.

### Hardy Climbing and Rambler Roses

#### Red

- 2131 Excelsa. Red, double glossy foliage which never mildews or spots. Extremely vigorous.  
2133 Crimson Rambler. One of the oldest and best.  
2134 Paul's Scarlet Climber. Rapid grower with wonderful double scarlet blooms.  
2136 Climbing American Beauty. Deep rose pink, having one bloom to a stem. Much used for cutting.

#### Pink

- 2130 Dorothy Perkins. Pink clusters of pink blossoms with crumpled petals, glossy foliage.  
2137 Christine Wright. Bright rose pink.

#### White

- 2138 Silver Moon. Silvery white flowers with yellow stamens.

#### Yellow

- 2132 Gardenia. Best yellow, but not as perfect as the pink or red ones. Flowers are double.

### Baby Ramblers

- 2142 Baby Dorothy. A prolific producer of pure pink flowers.  
2143 Catherine Zeimet. Pure, snow-white, double in profuse clusters. Foliage dark glossy.  
2144 Orleans. Brilliant geranium red suffused rose and deep cerise.  
2145 George Elger. Golden coppery changing to clear yellow when in full bloom.

### Hybrid Rugosa Roses

- 2151 Hansa. Double reddish violet, flowers of large size. Hardy.  
2152 Sir Thomas Lipton. White, double flowers. A continual bloomer.  
2153 F. J. Grootendorst. Beautiful small red flowers. Blooms all summer.

### Berry's Hardy Perennial Plants

## MASTODON STRAWBERRY PLANTS

**Wonderful, Newly Developed Strain. Get the Genuine.  
Nationally Advertised Mastodon. Here it is.**

**3430 Mastodon.** The wonderful new Everbearing Strawberry. Enough cannot be said for it. Under ordinary field culture it has produced at the rate of 350 16-quart crates the same year it was planted. Its great size and luscious flavor are greatly in its favor for the market. It will bring far better prices than the older everbearers because of its beauty and enormous size. It is unapproachable; you should start your Mastodon bed at once—it will reap fine profits for you. Postpaid: 50 plants, 90c; 100, \$1.45; 200, \$2.35. Not prepaid: 500, \$5.25; 1,000, \$9.75.

## Spring Bearing Plants

**Senator Dunlap**

withstand a lot of hardiness. It is highly productive. The berry is a good keeper and an excellent variety for commercial gardeners.

**3400 Senator Dunlap.** A favorite where ever tried. There are a few kinds a trifle earlier but they do not produce such fine fruit. It is early. The fruit is large. Color is a deep, rich red. It has the most delicious, sprightly flavor. Plant will

**3410 Dr. Burrill (The Million Dollar Strawberry).** You, no doubt, have heard of this famous variety. It is without question a wonderful berry. Vigorous growing, drought resisting, and long rooted. A little later than the Dunlaps. Large, delicious dark red berries. Postpaid price on each of above 2 varieties: 100, 90c; 200, \$1.50. Not prepaid: 500, \$2.25; 1,000, \$3.95.

**3415 Red Gold.** Red Gold is a revelation in spring varieties. Enormous size. Some measure eight inches around. Color is shining red. They do not contain the acid found in common varieties. Require less sugar, excellent for preserving. Fruiting season thirty days.

**3416 The Blakemore.** Variety developed by U. S. Department of Agriculture. It is considered by far the best commercial variety. Try this new berry.

Postpaid price on each of above 2 varieties: 50, 75c; 100, \$1.25; 200, \$2.00. Not prepaid: 500, \$4.75; 1,000, \$8.00.

## Blackberries

Postpaid: 25 or less, 5c each; 100, \$2.95.

**3700 Eldorado.** Hardy berries are large, jet black, in large clusters.

**3701 Early Harvest.** The earliest variety. Fruit rather small and sweet. Not recommended for the North, but does well in Missouri, Kansas, Southern Iowa, etc. It is an old standby.

**3702 Snyder.** The old standby. Very hardy, thrifty and vigorous growing. Berries are borne in large quantities.

## Raspberries—Red

Postpaid: 25 or less, 5c each; 100, \$2.95.

**3725 Latham.** Red. An extra hardy red raspberry from Minnesota. Extra good.

**3726 St. Regis or Everbearing Red.** Brilliant crimson, good size, ripens early; produces until frost.

**3727 Cuthbert.** Red. One of the old standbys. Sweet and very rich.

## Raspberries—Black

Postpaid: Strong Transplants, 25 or less, 8c each; 100, \$4.95. Tips, 100, \$2.95.

**Cumberland**

**3750 Cumberland.** Is the best known of all the black caps; a strong grower, heavy bearer and of excellent quality.

**3751 Kansas.** Earlier than the Cumberland. Large jet black berries. Heavy cropper, a great table berry. Moderately juicy, good flavor.

**3752 Plum Farmer.** Moderately large berries, jet black and quality excellent. Fine for eating, canning and marketing. Vigorous grower, good yielding.

## Currants

Postpaid: 25c each; 10, \$1.90; 100, \$12.00.

**3765 Cherry.** It is a very deep red, large, rather acid, but fine for jelly.

**3766 Fays Prolific.** Is not so red, bunches very large; is very productive.

**3767 Improved Perfection.** Is a cross between Fays Prolific and White Grape, a beautiful bright red.

**3768 White Grape.** The best of the white varieties.

## Gooseberries

Postpaid: 25c each; 10, \$1.90; 100, \$12.00.

**3770 Downing.** Is a more compact grower, berries green and very large; for dessert and canning.

**3771 Houghton.** Is the strongest grower, a good annual bearer, fruit of fair size.

## Miscellaneous Roots and Plants

**ASPARAGUS ROOTS,** Washington Rust Proof. Heavy bearing, produces large and tender shoots. Postpaid: 1-year, 100 roots, 99c; 2-year, 100, \$1.65.

**630 RUBARB ROOTS.** Spring tonic, once planted lives a lifetime. Postpaid: 10 for 75c; 25, \$1.45.

**631 HORSE RADISH ROOTS.** Crowns. Grind roots for relish. Postpaid: 10 for 60c; 100, \$4.45.

**632 HORSE RADISH CUTTINGS.** Postpaid: 10 for 40c; 100, \$1.45.

**633 SAGE PLANTS.** Broad leaf, used for seasoning. 2-year. Postpaid: 10 for 95c; 100, \$8.00.

**Asparagus**

# OUR PRICES ARE LOWEST

# ORCHARD and FRUIT TREE

# SPECIALS

**HIGHEST QUALITY  
NORTHERN GROWN  
STOCK**

OUR FRUIT TREES are extra selected stock. Grown only 25 minutes' drive from our Seed House. Hundreds of acres of all kinds of nursery stock to select from and under Supervision of Horticulturists from the State Department, which makes the stock you buy free from disease; and another feature: your nursery stock does not make two or three trips before you get it.

## GUARANTEE

We guarantee that our stock will reach the purchaser alive and in a growing condition. If any stock fails to grow and we are notified by July 1, 1933, we will make replacement free of charge. After that date, replacements will be made only at half-price.

## SIZES

We offer all our fruit trees in two sizes. The mail sizes are 1-year trees on 2-year roots, 3 to 4 feet. The express are 2-year-old trees on 3-year-old roots, and are 4 to 5 feet high.

## Summer Apples

- 3500 Red June.** Early bearer, hardy. Red. Medium size. High flavor.
- 3501 Yellow Transparent.** Flesh white, juicy and fine grained. Very fragrant when fully ripe. Fine for eating or table. Ripens in August.
- 3502 Duchess.** Early, very hardy, red striped, juicy, the very best quality for cooking.
- 3503 Maiden Blush.** A large apple with a beautiful blush on side. A pleasant sub-acid flavor and a valuable apple.

## Fall or Autumn Apples

- 3505 Fameuse or Snow.** Flesh snow-white, crisp. Has an excellent flavor, ripens in November. Will keep up into January.
- 3506 Wealthy.** Best of all fall apples. Striped bright red and a wonderful quality. Ripens between the Jonathan and Duchess.

## Winter Apples

- 3510 Delicious.** This apple commands the highest price in the market. Fine grained, crisp and juicy, sweet slightly touched with acid. Equal to the best. The best eating apple.
- 3511 Grimes Golden.** Early annual bearer. Yellow, crisp, spicy, sub-acid.
- 3512 Jonathan.** A red apple; fine for winter. Tender and juicy.
- 3513 Staymen Winesap.** Dark rich red; flesh firm and crisp. Exceedingly juicy and tender. Bears young.
- 3514 Ben Davis.** Fruit large size, red striped, good keeper.
- 3515 Gano or Black Ben Davis.** Fruit dark red, a good variety, fine cooking.
- 3516 Mammoth Black Twig.** A large red apple, considered superior to Winesap.
- 3517 Romanstem.** Color yellow. Excellent for eating or cooking.
- 3518 Tolman Sweet.** Valuable apple for baking. Will keep until April.
- 3519 Northwestern Greening.** Long keeper, very hardy, fruit extremely large.

## Crab Apples

- 3520 Red Siberian.** Small. Used for jelly and pickles. Showy red; vigorous and hardy. August to September.
- 3521 Whitney Crab.** A rapid grower, hardy. Medium size. Yellow, striped with red, very juicy and fine grained. Flavor rich, almost sweet.

## Peaches

- 3574 Champion.** Very hardy. Creamy white skin, red cheeks; freestone. Ripens about two weeks before the Elberta.
- 3575 Crawford's Early (Freestone).** Best early market. Fruit very large. Color yellow, juicy and fine flavored.
- 3576 Elberta.** The great market peach of the Southwest. Very large, yellow with red cheek.
- 3577 J. H. Hale.** Like Elberta, but earlier.
- 3578 Heath Cling.** Large creamy white. Excellent quality. Good keeper.

# BERRY'S BLUE RIBBON COLLECTIONS

**CHERRY COLLECTION.** This is a collection that nearly everyone should have.

It consists of 3 Fine Early Richmond, 2 Montmorency, and 1 of the big English Morello. They are the kinds the people want. They are all excellent. Having an assortment gives you slightly different types of fruit and they are not all ripe at the same time. This famous Cherry collection is exceedingly popular. You can't go wrong in selecting what thousands are buying. This is an extra value bargain.

**Six Fine Trees 1-yr. stock on 2 yr. roots, postpaid for \$1.49. Two collections for \$2.79.**

## PLUM COLLECTION.

A great combination in plums. Plums often bear two years after planting. These trees can be set where most trees would not thrive. Plums are wonderful for canning and jelly. Try this collection. It is an exceptional value. Perhaps you may have a neighbor who would join you in ordering some of these collections.

**6 Fine Trees 1-yr. stock on 2-yr. roots, 2 Waneta, 2 Terry, 1 Sapa and 1 Underwood, postpaid for \$1.65. Two collections for \$3.15.**

**APPLE COLLECTION.** A Splendid Bargain—A Popular Favorite. This is a dandy. 1 Maiden Blush, 1 Yellow Transparent, 1 Wealthy, 1 Ben Davis, 2 Junes, 2 Delicious, 2 Grimes Golden. Those are the famous favorites of today. An assortment or two like this on a place adds much to its value. People want apples and they want good ones. Plant these assortments and you play safe. This is all high grade stock. We know our customers want this quality. That's what makes satisfaction. It's a real bargain offer.

**10 Fine Selected Trees 1-yr. stock on 2-yr. roots, postpaid for \$1.69. Two collections or 20 trees, for \$3.20.**

## PEACH COLLECTION.

You save 30 per cent in ordering this assortment. This wonder-value consists of 2 Elberta, 2 J. H. Hale, 2 Crawford, 1 Champion, 1 Cling Peach. All standard varieties of unquestionable merit. These trees carefully selected from our special stock and guaranteed to please you. These eight trees, if bought separately would cost you \$2.10, while most firms will charge you even more. You will find the quality better than the average. It is easier to have fine Peaches when you plant these better trees.

**8 Hardy 1-yr. trees on 2-yr. roots postpaid for \$1.29. Two collections delivered for only \$2.39.**

## GRAPE COLLECTION

**No. 1. Ten 1-yr. vines postpaid for 89c. Collection No. 2. Ten 2-yr. vines postpaid for \$1.39.** Both collections consist of 2 Moore's Early, 2 Niagara, 2 Agawam, and 4 Concord. The choicest stock is used in both. Either will give excellent satisfaction. Takes a year longer, of course, to get results from 1 year stock. We can make these extremely low prices by assembling these collections in advance. You save 25% to 30% in this way. You get a pleasing variety of good hardy vines. You'll be delighted with this quality.

## A VEGETABLE GARDEN CUTS YOUR COST OF LIVING

**95¢ VALUE for 49¢**

# GENUINE NORTHERN GROWN GRIMM ALFALFA LOT BLUE RIBBON

ORIGIN VERIFIED BY  
U.S. DEPT of AGRICULTURE

PACKED IN SEALED BAGS

CLEANED, TESTED and TAGGED  
UNDER STRICT SUPERVISION

GUARANTEED 99½% PURE

## LOT JUST-RITE RED CLOVER

An Extra Good  
Seeding at a Super  
Bargain Price

Contains 25% to 30% Alsike

Farmers who have tried such a seeding like it better than straight Red Clover. Gives a heavier production, makes wonderful hay. You have better assurance of a complete heavy stand.

Alsike is one of the easiest Clovers to get started. Less particular as to soil conditions. If you have spots in the field where Red Clover might come up thin, the Alsike is almost sure to catch. Fills in the space between the Red all over the field adding greatly to the yield and improving the quality. Lot Just-Rite makes truly an ideal seeding.

### Thoroughly Dependable Seed

This is reliable seed stock. It has been thoroughly recleaned and tested. There is no guess work about any of our shipments. This seed has the ability to produce strong, clean healthy stands. All hardy Northern grown seed, adapted to any part of the nation.

It is a bargain that will save you real money. We guarantee that you cannot find a value to equal it anywhere else. Only takes around 7 pounds per acre. Use Lot Just-Rite to hold down seeding costs and to get an unusually fine Clover seeding. We know you will be satisfied.

\$ **6**<sup>30</sup>  
PER BU.

## GRIMM ALFALFA SPECIAL

### LOT BLUE RIBBON

Extra  
High Quality  
Genuine Grimm  
Alfalfa Northern  
Grown U. S.  
Verified Origin

\$ **11**<sup>70</sup>  
PER BU.

### See Sample Enclosed

Look at this seed. Doesn't it have a fine color and nice big berries. It is just as good as it looks, too. High purity and germination. Genuine Blue Ribbon Grimm. Hardest Northern grown seed. Origin verified by the U. S. Department of Agriculture. We have certificates from growers certifying as to its genuineness. This seed is cleaned, tested and graded under strict supervision. Comes packed in sealed bags for your protection. It is a beautiful lot of seed. There is no stock that could give you better assurance of the most satisfactory results.

### Priced Extremely Low

When you compare this sample of Grimm Alfalfa with any other you can get from any source you will quickly see that our price is low. Be sure your other seed is also U. S. Verified Origin.

You will find a saving of around \$2.00 to \$3.00 per bushel. That is a saving worth while. We can sell such a bargain only because we bought early before most seedsmen knew there was such an alarming shortage of northern Alfalfa seed. Then too, we sell to you direct and there is only one small profit added.

### A Matchless Value

This bargain could not be duplicated if we had to go in the market today. It is worth more in a wholesale carlot way than we are selling it for direct to farmers. Your dealer may tell you such a bargain is not obtainable but here it is for you to profit by. Every bushel we have of it will be sold at this price. You can share in the bargain so long as the stock lasts. We advise you to order as early as possible for this is truly a most extraordinary bargain in genuine Grimm Alfalfa.
